

designed and built to last in harsh environments

The X320 combines innovation in industrial design and engineering excellence to create a product that is ideal for use in heavy wash down applications and rugged environments.

- Food processing
- Automotive
- Chemical
- Pharmaceutical applications
- Applications that require reliable operation in harsh environmental conditions

(and nothing gets in!)

Rated to IP69K - the industry's highest environmental protection rating. Meaning the X320 has been designed to withstand cleaning with high pressure water jets (1450psi) at high temperature (up to 80°C) from multiple angles.

Tough enclosure - the X320 is made of an impact resistant composite alloy and designed to withstand knocks.

X320 with optional pole mount.

(exceptional housing)

What makes this housing exceptional?

The design - sealed and tough

- Double O ring to seal the two clams
- Single front panel to protect the display and avoid leaks
- Capacitive keys therefore no moving parts
- No glued membrane to fail
- No traditional keypad to damage
- No external parts using adhesive
- Sturdy design with enhanced wall strength

The material - high tech composite alloy

- Food grade
- Chemical resistant
- Impact resistant
