

Lampart Australasia Pty Ltd

Company Portfolio

Company Statement

Established over 40 years ago, we remain a family owned and operated business to this day.

We've seen all the major changes in the lighting industry, including the shift into energy efficient LED technology as the cost of electricity continues to increase- putting strain onto families and businesses alike.

Very few lighting manufacturers remain in Australia with the capability to design and produce to your needs, right here! Our paint workshop includes baked enamel and powder coating.

The art of lighting is more than selling lights.

The experience of having designed custom lighting solutions for government, schools, and countless commercial, domestic, and industrial customers means you will find the best advice for whatever you are looking for.

Come see our factory showroom at Unit 3-4/35 Bryant Street, Padstow NSW.

You'll also find products for domestic and commercial applications, parts for new and old, as well as 100% Australian made aluminium extrusion for all types of lighting.
