### Section 8: EXPOSURE CONTROLS

**Ventilation:** Use only in a well-ventilated areas. Provide local exhaust ventilation where dust or mist may be generated.

**Eye protection:** Wear chemical safety goggles. Avoid wearing contact lenses if possible. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.

**Respiratory protection:** Where any dust in the breathing zone cannot be controlled with local ventilation, wear officially approved respirator for protection against airborne dust. An approved respirator with EN140 (chlorine) cartridges may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits, or when symptoms have been observed that are indicative of overexposure. The added protection of a full-face piece respirator is required when visible dusty conditions are encountered and eye irritation may occur. A respiratory protection program that meets applicable regulatory requirements must be followed whenever workplace conditions warrant use of a respirator.

**Skin protection:** Wear suitable chemical resistant gloves. Protective Material Types: Butyl rubber, Natural rubber, Neoprene, Nitrile, Polyvinyl chloride (PVC).
