

What Is Liquid Bentonite?

Geologically, Bentonite is a rock composed of clay minerals formed by the alteration of minute glass particles that once composed volcanic ash. Being a native and colloidal, liquid colloidal Bentonite is not a drug or a chemical composition made in a laboratory by man, but instead is a product of Mother Earth.

As Old As Civilization

The use of volcanic ashes or clay internally is as old as civilization. Colloidal Bentonite has been used extensively in the form of a gel, as a bulk laxative, and also as a base in many dermatologic formulations. A desirable property of colloidal Bentonite is its avid absorption of other substances, both organic and inorganic. Because it is volcanic ash, it has the same gravity as our blood. The body absorbs it without going through the digestive system.

Stop Food Poison

Primitive tribes used it to prevent a sick stomach or toxicity. They carried it with them and used it on their foods to prevent sickness. They mixed it in their water for protection against water borne bacteria and toxins. Favorable results have been reported in cholera, bacillary dysentery, acute bacterial food poisonings, ulcerative colitis, various forms of enteritis, and peptic ulcers. It has been established in vitro (in the laboratory) and in vivo (in the human body) that liquid colloidal Bentonite absorbs toxins, bacteria and viruses. Although it is insoluble in water, it swells to approximately

12 times its volume when added to water. **Dr. LaMar's Liquid Bentonite** is also great for use as a poultice.

Characteristics of Liquid Bentonite

- It has a large variety of minerals and trace elements which it doesn't release, making it like a big magnet capable of holding 500 times its weight in free radicals.
- It has a negative ionic electrical charge which attracts positively charged particles (free radicals and toxic poisons).
- Its particles are shaped like a "calling card," the wide surfaces being negative and the edges being positive. Being more negatively charged will attract many times its own weight in toxins that are positively charged.
- **Dr. LaMar's Liquid Bentonite** has a large surface area in proportion to the volume used, enabling it again, to attract many times its own weight in toxins that are positively charged. To obtain maximum effectiveness for internal use, it must be put in a liquid colloidal state. In a suspended liquid state, its power to absorb is far greater and more active than Bentonite clay in tablet or capsule form.

Suggested Uses

The following information is for educational purposes only and not designed to diagnosis any illness or to replace proper medical treatment.

At the first sign of colds, sore throats, or fever chills:

Take 1/2 cup of **Dr. LaMar's Liquid Bentonite** with 10 drops of **Dr. LaMar's Liquid Stabilized Oxygen**. Follow with 2 Tablespoons of **Dr. LaMar's Liquid Bentonite** mixed with 10 drops of **Dr. LaMar's Liquid Stabilized Oxygen** every 2 hours while awake.

Insect bites, snake bites, bee stings, spider bites, minor cuts, scrapes, bruises, bumps, burns and wounds:

Apply a cold poultice with **Dr. LaMar's Liquid Bentonite** and 10 drops of **Dr. LaMar's Liquid Stabilized Oxygen**. Leave on for 2 hours. Keep poultice moist. At night use a compress of **Dr. LaMar's Liquid Bentonite** and **Dr. LaMar's Liquid Stabilized Oxygen** until total disappearance of pain.

Food and chemical poisoning; environmental toxins:

Take 1/2 cup of **Dr. LaMar's Liquid Bentonite** with 10 drops of **Dr. LaMar's Liquid Stabilized Oxygen**. Follow with 2 Tablespoons of **Dr. LaMar's Liquid Bentonite** mixed with 10 drops of **Dr. LaMar's Liquid Stabilized Oxygen** every 2 hours while awake.

Abscesses, mouth sores, boils:

Make a poultice of **Dr. LaMar's Liquid Bentonite** and **Dr. LaMar's Liquid Stabilized Oxygen** or saturate a cotton ball. Place against sore for as long as possible. Change three times a day. If possible keep it on all night. In addition, orally take 3 Tablespoons twice a day morning and night on an empty stomach.

Stomach Ulcers:

1 Tablespoon of **Dr. LaMar's Liquid Bentonite** 4 times a day on an empty stomach.

Colon Cleanse:

3 Tablespoons of **Dr. LaMar's Liquid Bentonite** twice a day morning and evening.

Dr. LaMar's OxyBowel™ : 1 to 2 capsules twice a day, morning and bedtime.

Dr. LaMar's FiberAide: 1 to 2 scoops twice a day, morning and bedtime. Mix with juice or water.

Acne:

3 Tablespoons of **Dr. LaMar's Liquid Bentonite** twice a day, morning and bedtime. Make a poultice mask at bedtime

Side Effects

You can take up to 1/2 your body weight in one day without side affects.

Here's What Some Customers Are Saying

"Thank you for the Stabilized Oxygen and Dr. LaMar's Bentonite. I use them every time I feel something coming on. If I catch it right away, I have stopped colds, sore throats and fever chills in a half hour."

CLM, Kansas City, MO

"My husband got bitten by a brown recluse spider. We applied a poultice with the Bentonite and Stabilized Oxygen three times a day and in two weeks it was gone. A friend of ours came by several weeks later and said he had been in the hospital for two weeks because he had been

bitten by the same kind of spider. He said they had been afraid that he would lose his leg."

Claudia D., Emporia, KS

"My husband and I both got really sunburned. He used Aloe Vera gel on his and I used Bentonite on mine. He was still red and sore the next morning but I wasn't. Now he uses the Bentonite also. My son used it on the bad acne he had on his face and felt it really helped."

S. Cupp, Raymore, MO

"I stepped off the sidewalk onto a piece of broken glass and sliced open the side of my foot. Had I gone to the doctor, he would have put stitches in it, but I used a poultice of Bentonite and Stabilized Oxygen and it stopped the pain, bleeding, and healed right up."

Chris. D., Overland

Park, KS

All of our products are supercharged with bio-rhythms to protect our body from EMFs and scanning.

Before taking this product, pause for a moment and **"Give God the Glory For Your Health"**. Thank Him for what you want the nutrients to do for you and **"Feel the Difference"**.
