HOW TO USE YOUR PLANNER

6

6

TO KEEP YOURSELF ON TRACK

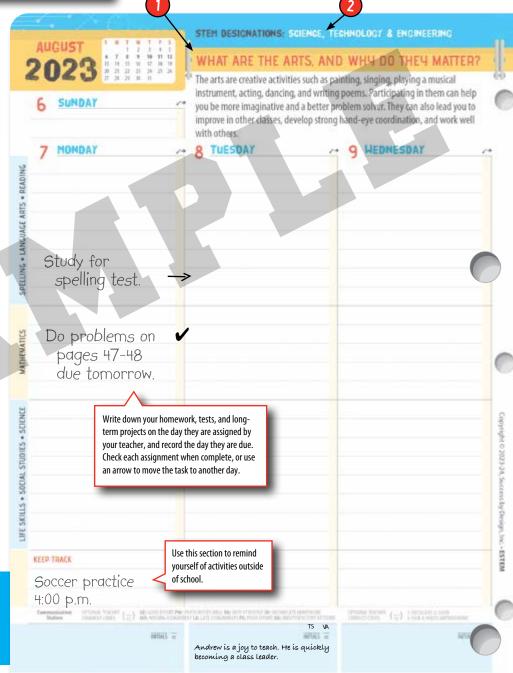

Use the big calendar before each month to help you remember special days at school or home. Read about the STEM-related topic of the month. Doing so will introduce you to the types of questions that will be answered for you throughout the month, along with the STEMazing facts with which you will be presented.

NOTE TO PARENTS/ GUARDIANS...

We encourage you to assist your child in utilizing this STEM Student Planner to keep track of his or her daily assignments and activities. Cultivating good organizational skills is vital to a student's academic success. Be certain to initial the planner in the space provided on each right-hand page each evening after ensuring all daily tasks have been completed, and use this space to communicate with your child's teachers.

To help your child better understand the importance of science, technology, engineering, and math in both today's world and their own lives, routinely review each week's question and STEMazing fact. More information on all STEM-related topics featured throughout this planner can be found by visiting the website on each weekly layout.

FIND HELP WITH SUBJECTS LIKE MATH AND ENGLISH ON THE EXTRA RESOURCE PAGES FOUND IN THE BACK OF YOUR PLANNER!

IN ADDITION TO TEACHING YOU ABOUT SCIENCE,
TECHNOLOGY, ENGINEERING, AND MATH,
YOUR STEM STUDENT PLANNER™ WILL HELP YOU BE SMART
WITH YOUR TIME. SEE HOW ON THESE TWO PAGES!

STEMAZING WORLD!

Most of the time we take for granted all we owe to science, technology, engineering, and math. As a matter of fact, you might find it surprising where we would be without them! Just imagine a world with no computers, smart phones, medicines to make you feel better when you are sick, or even numbers!

Your STEM Student Planner is meant to help you learn more about these four subjects. Each one — science, technology, engineering, and math — is becoming more and more important not only to our world but to your own life too! It is wise to learn all you can about them.

You will notice your planner focuses on a different STEM-related topic each month. During each week of the month, the various sections listed below will teach you more about the featured topic:

QUESTION OF THE WEEK

Science, technology, engineering, and math are key to unlocking many of life's mysteries. In this section, you will find an answer to a question that pertains to the topic of the month.

STEM DESIGNATION(S)

Here we list for you the STEM subjects science, technology, engineering, and math—that are most closely related to the question of the week and the STEMazing fact that accompanies it. While this may sometimes be just one of the four, in many cases you will find they overlap. In such cases, several are listed.

STEMAZING FACT

This interesting and sometimes surprising fact ties in with the weekly question to provide you with yet more information relating to the topic of the month.

WEEKLY REFERENCES

Here you are provided with a website you may visit to learn more about the weekly question and fact. A QR code quickly takes readers to the source of the weekly question and fact. All sites were active when your planner was printed.

STEM AND... ART, \ART\, NOUN

1. something that is created with imagination and skill and that is beautiful or that expresses important ideas or feelings

Art is all around us, and not just in the form of paintings, drawings, and sculptures. The way we experience objects, locations, products, and services is rooted in art. The chairs on which we sit, the smart phones in our hands, and the buildings we spend time inside would not exist without the art-influenced creativity of artistic designers. Art is in the talents of songwriters and musicians who craft songs we enjoy; it's in the directing and acting that brings movies and TV shows to life; and it's evident in every leap and turn of a ballet dancer's routine.

Many STEM careers revolve around the arts. Curators preserve and display beautiful historical and contemporary works of art for all to enjoy; medical illustrators create detailed images to help explain complex medical processes to the general public; and recreational therapists use music, crafts, and dance to help patients cope with mental, emotional, and physical problems.

Are you an artistic person? Do you enjoy being creative? Do you like coming up with new ideas to fulfill everyday needs? Maybe a STEM career focusing on art is in your future!

DID YOU KNOW?

August is American Artist Appreciation Month. Regardless of the medium they use, artists enrich our lives through their creative design talents in many different ways. The work they create evokes emotion, enhances daily life, entertains, or fulfills practical needs. Take time to look around and appreciate how much of what you see was crafted by the mind of an artist.

NUON , / NEH2-NENTS'-NEN /, NOUTOUN /, NEH2-NENTS'-NEN /, NOUTOUN /, NEH2-NENTS'-NENTS

1. the act or process of constructing: 2. the art, trade, or work of building

Construction is critical to the progress of a country and greatly impacts its people. Workers in this field put up buildings, demolish structures, dig trenches, perform excavations, and build and repair roads.

The construction industry makes it possible for the public to thrive. Business owners need offices from which they and their staff can work, people need homes in which to live, and children need schools to attend. We can also thank workers in the construction field for our water supply and sewage treatment systems. Try to imagine what your town would be like if none of that existed!

From the early stages when a project is first designed, to the moments the last brick is laid or the grounds are landscaped, there is cooperation involving many people to make it all happen. Professionals such as carpenters, electricians, contractors, civil engineers, and plumbers all have a hand in the different aspects of construction and work together, using the latest technologies to get the job done.

Such cooperation enables fully developed nations like the United States, Canada, Greece, and the United Kingdom to handle their ever-growing populations, and it also aids lesser developed areas such as Bangladesh, Ethiopia, and Haiti in raising their standards of living.

DID YOU KNOW?

Labor Day began in Canada in 1872 when a parade was held to support a strike against the then 58-hour workweek. The first Labor Day celebration in the U.S. took place in 1882 in New York City's Union Square. It was held to gain support for reducing the average 12-hour workday to 8 hours. Ten thousand workers marched from City Hall to 42nd Street and then met their families for a picnic, concert, and speeches.

STEM AND... ENERGY, \E-N3R-JĒ\, NOUN usable power (as heat or electricity); also: the resources for producing such power

We use a lot of energy. It lights our homes. Its powers equipment in our office buildings. We put it to work when we drive our vehicles, haul goods from place to place, and manufacture the products we buy. Energy is needed in every part of our lives!

The U.S. Energy Information Administration predicts that by the year 2040, the amount of energy people around the world use will increase by 56 percent. In America alone, energy use is doubling every 20 years. These are some big numbers!

All of this means we must use energy more wisely. We also need to keep exploring alternative, or other clean, renewable energy options. Renewable energy sources include the sun, wind, and water. They are plentiful and ongoing, and help us depend less on nonrenewable fossil fuels such as coal, oil, and natural gas. One day, these nonrenewable sources will be gone.

We are working now to prepare for this day. Science, technology, engineering, and math will help us develop sources that can provide us with the energy we need over and over, but we must still do all we can to use less of it in the first place.

DID YOU KNOW?

Americans use more energy than people who live in most other nations. The United States is home to only about five percent of the people who live on Earth. Yet its residents use some 23 percent—or almost one-quarter—of the world's energy. Schools teaching students in kindergarten through grade 12 spend over \$6 billion on energy use each year! October is National Energy Action Month. It is a time for us to start using energy in smarter ways.

RECOMMENDED WEBSITES FOR HOMEWORK HELP

History Channel (www.history.com) – Provides reference on historical topics. This includes informative timelines, photographs, and limited episodes.

Math.com (www.math.com) – Offers free math lessons and homework help for all grade levels.

National Geographic Kids (kids.nationalgeographic.com) - Enables you to tour the natural world (flora, fauna, people, and places) from your computer.

Kid Info (kidinfo.com) - Created by a retired teacher, this site offers numerous informational links to subjects

covered in most U.S. schools. B.J. Pinchbeck's Homework Helper (bjpinchbeck.com) – Provides over 800 updated links covering subjects from

InfoPlease.com (www.infoplease.com) – Lets you conduct searches for specific topics.

art and English to math and science.

Please Note: These websites were active at time of publication.

ENGLISH

PUNCTUATION GUIDELINES

PERIOD (.)

- Place a period at the end of a declarative sentence.
 Example: Andy and his friends visited the museum.
- Also use a period at the end of an imperative sentence that does not express strong emotion.

Example: Please pick up that piece of paper.

- · Use after an initial.
 - Example: Lyndon B. Johnson
- Use after an abbreviation.
 - Example: October Oct.
- Use at the end of a direct quotation if the quotation is a statement or a command.

Example: Tammy said, "I am going to the market."

COMMA (,)

- Use a **comma** to separate words and phrases in a series. Example: We bought some socks, two shirts, and a pair of jeans.
- Use before the words and, or, or but when they join two simple sentences in a compound sentence.

Example: It was a long drive, and I decided to sleep along the way.

- Use to set off the name of someone addressed.

 Example: "Julie, please do the dishes."
- Use to set off the words yes, no, and well at the beginning of a sentence.

Example: "Well, I really don't feel well."

- Use between a city and a state.
 - Example: Pittsburgh, Pennsylvania
- Use between the day and the year.
- Example: March 18, 1976

 Use to separate a speaker's words from the rest of
- the sentence in a direct quotation.

 Example: Phillip said, "I'm looking forward to helping you."

QUESTION MARK (?)

Use a question mark after all interrogative sentences.
 Example: Would you like to go to the movies?

EXCLAMATION MARK (!)

- Use an exclamation mark after sentences that express surprise or deep feeling.
 - Example: I can't believe I ran into you today!

SEMICOLON (;)

- Use a semicolon when a conjunction is omitted; it indicates a greater degree of separation than a comma would.
 - Example: The water was very rough; our boat rocked back and forth.

COLON (:)

- Use a colon to start a list or to formally introduce a statement.
 - Example: Rebecca has three pets: a dog, cat, and fish.

APOSTROPHE (1)

- Use an **apostrophe** to replace a letter or letters that have been left out in a contraction.
 - Example: will not = won't
 Use to show possession in singular nouns.
- Example: Mary's game

 Use to show possession in plural nouns that end in s.
- Example: The teachers' desks are brown.
- Use to show possession in plural nouns that do not end in s.

Example: The women's clothes are in this section of the store.

QUOTATION MARKS ("")

- Use quotation marks to show the exact words of a speaker.
- Example: "It's nice to meet you," Walter said.
 Use around the titles of stories, poems, songs, magazine articles, and essays.
 - Example: "The Star-Spangled Banner"

PLURALS

- Most nouns are made plural by adding an s to the singular.
 cat + s = cats, flower + s = flowers
 - truck + s = trucks, dream + s = dreams
- Nouns ending in sh, ch, x, s, and z are made plural by adding es to the singular.
 - dish + es = dishes, hutch + es = hutchesbox + es = boxes, loss + es = losses
- The plurals of common nouns ending in **y** preceded by a consonant are formed by changing the **y** to **i** and adding **es.**

cry + es = cries, French fry + es = French fries kitty + es = kitties, firefly + es = fireflies

 The plurals of nouns which end in y preceded by a vowel are formed by adding only s.

> donkey + s = donkeys, day + s = daysway + s = ways, monkey + s = monkeys

CONTRACTIONS

A contraction is a shortened form of two words. An apostrophe takes the place of the missing letter or letters in each contraction.

• Pronoun Contractions:

Pronouns are joined with helping verbs and linking verbs.

I + will = I'll, they + have = they've

we + are = we're, you + would = you'd

Verb Contractions:

Helping verbs and linking verbs are joined with the word **not.**

would + not = wouldn't, has + not = hasn't is + not = isn't, was + not = wasn't

6

Common nouns refer to any person, place, thing, or idea.

Examples: boy school vegetable

Examples: boy school vegetal city government gloom

Proper nouns are capitalized and refer to specific persons, places, objects, or ideas.

Examples: Amber Niagara Falls
England Saturday

2 PRONOUN

A pronoun can take the place of a noun.

Example: Bob saw **his** sister as **she** walked down the hall.

There are three kinds of pronouns.

Example: **He** is looking at **it** through **his** camera.

subjective objective possessive

3. VERB

A verb shows action or state of being and indicates the time of that action or state.

Examples: We watched the parade. (past)

We **are watching** the parade. (present)
We **will watch** the parade. (future)

4. ADJECTIVE

Adjectives are words that describe nouns and specify size, color, number, and the like. This is called modifying; adjectives are modifiers.

Example:

A large, black dog ran into the old, red barn.

SPELLING RULES

I before **e** Except after **c**,

Example:

- Or when sounded as **a** As in r**ei**gning and w**ei**gh.
- Final consonants are not doubled when the word ends in more than one consonant.

Examples: round rounded rounding sign signed signing

 When words end in soft ce or ge, keep the e before able and ous.

Examples: trace traceable advantage advantageous

lying

lied

 When verbs end in ie, change the termination to y before adding ing.

5. ADVERB

Adverbs are words that describe verbs, adjectives, or other adverbs. They specify in what manner, when, where, and how much.

Examples: The boy laughed **cheerfully** as he flew the kite.

He was **extremely** happy.

6. PREPOSITION

Prepositions show how a noun or a pronoun is related to another word in a sentence.

Examples: We walked **around** the corner.

She stood **near** the building.

7. CONJUNCTION

Conjunctions join words, phrases, or clauses.

Examples: **Neither** he **nor** she was allowed to go to

the game.

We yelled at him, **but** he could not hear us.

not near t

8. INTERJECTION

Interjections are also known as exclamations and are signaled by the use of the exclamation mark (!).

Example: Hey! Look out for that truck!

GENERAL SPELLING INFORMATION

The spelling of some nouns is changed to form plurals.

Singular	Plural
mouse	mice
tooth	teeth
foot	feet
woman	women
child	children
man	men

The singular and plural forms of some nouns are the same.

Singular	Plural
moose	moose
fish	fish
deer	deer
trout	trout
sheep	sheep
elk	elk

Length 1 foot (ft) = 12 inches (in) 1 yard (yd) = 3 feet 1 yard 36 inches 1 mile (mi) 5,280 feet = 1 mile = 1,760 yards Liquid

= 8 fluid ounces (fl oz) 1 cup (c) 1 pint (pt) = 2 cups

1 quart (qt) = 2 pints1 gallon (gal) = 4 quarts

Weight

1 pound (lb) = 16 ounces (oz)1 ton (t) = 2,000 pounds

Metric System

Length

1 centimeter (cm) = 10 millimeters (mm) 1 decimeter (dm) 100 millimeters 1 decimeter 10 centimeters 1 meter (m) 1,000 millimeters 100 centimeters 1 meter 10 decimeters 1 meter 1 decameter (dkm) = 10 meters 1 kilometer (km) 1,000 meters

Liquid

1,000 milliliters (mL) 1 liter (L) Weight

> = 1,000 milligrams (mg) 1 gram (g) = 1,000 grams 1 kilogram (kg)

Time

1 minute (min) = 60 seconds 1 hour (hr) 60 minutes 1 day (d) 24 hours 1 week (wk) 7 days 1 year (yr) 12 months (mo) 52 weeks 1 year 365 days³ 1 year 1 decade 10 years 1 century 100 years

ROMAN NUMERALS

 $I_{=1}$ $V_{=5}$ $X_{=10}$ $L_{=50}$ C = 100 D = 500 M = 1,000

NUMBER LINE

NUMBERS

Prime Number: A whole number greater than one

which has only two factors,

itself and 1. Ex: 2, 3, 5, 7, 11, 13, 17, 19, 23

Common Factor: A number that is a factor of two or

> more numbers. Ex: 1, 2, 5, and 10 are common factors of 20 and 30.

Greatest Common Factor: The greatest number that is a factor

of two or more numbers.

Ex: 8 is the greatest common factor of

24 and 32.

Least Common Multiple: The smallest number that

is a multiple of two or more numbers.

Ex: 20 is the least common multiple of 2, 4, and 5.

Numerator:

Number above the line in a fraction.

Denominator: Number below the line in a fraction.

Penny

= 1¢

= 1 cent

= \$0.01

= 5 cents

= \$0.05

= 5¢

= 10¢

= \$0.10

Dollar = 100 cents = 100¢ = \$1.00

^{*}except leap years, which have 366 days
