## INTERNATIONAL

 [kamexinternational.com.co](http://kamexinternational.com.co)

We are a Colombian Company that helps people to improve their physical and emotional security, anticipating to their comfort and health needs through design, production management and orthopedic and home care product marketing, promoting the individual and collective development of human talent within and outside the Company.

We have acquired and developed our own technology for the manufacture of products, maintaining quality and control standards in production, we have brand presence throughout the Colombian and Latin American territory.

# SHOULDER AND NECK ORTHOSES

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[© kamexinternational.com.co](http://kamexinternational.com.co)

**PHILADELPHIA TYPE COLLAR**

Orthosis for good alignment of the cervical spine and immobilizer of its arcs of movement.

**Uses:** acute sprains of the cervical spine, whiplash syndrome, post-operative at cervical level.

**Characteristics of the product:** Anatomical design in high density foam. Comfortable and breathable material. The back is inserted into the front part. Cotton lining for improved hygiene.

Size	Ref	Cover Replacement
XS	KM051	FKM051
SM	KM053	FKM053

MD	KM055	FKM055
LG	KM057	FKM057

**THOMAS COLLAR**

Orthosis for good alignment of the cervical spine with slight limitation of its arcs of movement.

**Uses:** chronic sprains of the cervical spine, neck pain, cervical osteoarthritis, cervical muscle tension.

**Characteristics of the product:** Anatomically designed in low-density foam. Cotton lining with interchangeable replacement.

Size	Ref
Children	KM000
Pediatric	KM002

Size	Ref
Universal	KM001

**EMERGENCY COLLAR**

Rigid orthosis to achieve complete immobilization of the arcs of movement of the cervical spine.

**Uses:** Stabilization in case of emergency in conscious or unconscious patients.

**Characteristics of the product:** Cervical support. Contact closure. Washable material. Front hole that allows emergency tracheostomy.

Size	Ref
S/M	KM153
L/XL	KM155

**CLAVICLE IMMOBILIZER**

Orthosis with figure eight padded straps to achieve alignment of the clavicle.

**Uses:** Linear fractures of the clavicle. Acromioclavicular and/or sternoclavicular sprain. Tendonitis and instability.

**Characteristics of the product:** Wide and cushioned shoulder pads at the site of the injury. Support at the level of the dorsal spine for greater stability, stainless steel safety buckles with sliding bar.

Size	Ref
MD	13005
LG	13007

**NEOPRENE SHOULDER STRAP**

Orthopedic shoulder support to offer stability and protection, providing compression and warmth to relieve pain and help increase recovery.

**Uses:** soft tissue trauma, bursitis and shoulder instability.

**Characteristics of the product:** 4mm Neoprene compatible with velcro and contact closures.

Size	Ref	
	Beige	Black
S/M	13080B	13080N
L/XL	13090B	13090N

**AIRPLANE TYPE SHOULDER IMMOBILIZER**

Post-trauma or postoperative care shoulder Orthosis, keeps the shoulder at 45° to ensure excellent rehabilitation.

**Uses:** Post-operative of rotator cuff and shoulder trauma.

**Characteristics of the product:** High density injected foam covered with padding material for greater comfort.

Size	Ref
Universal	KM500

**SHOULDER IMMOBILIZER SLING WITH STRAP**

Shoulder orthosis with strap immobilizer for trauma and instability.

**Uses:** Indicated for fractures, sprains and shoulder injuries.

**Characteristics of the product:** Its bag-shaped design provides supports to the forearm and the strap is placed around the chest to ensure the shoulder immobility. Manufactured in padded fabric for the patient's comfort.

Size	Ref
Children	KM2201
Adults	KM2200

**IMMOBILIZER SLING**

Shoulder orthosis with circular immobilizer at the back, for trauma and instability.

**Uses:** Indicated for fractures, sprains, and shoulder and elbow injuries.

**Characteristics of the product:** Made of strong and durable denim, with anatomical design, free graduation fasteners for easy placement.

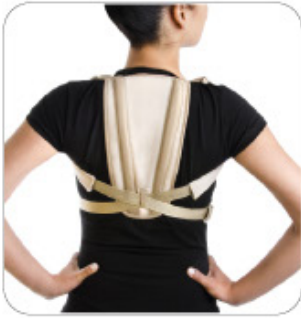

Size	Ref
Pediatric	KM2101
Children	KM2102

# SPINAL COLUMN ORTHOSES

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[kamexinternational.com.co](http://kamexinternational.com.co)

**UNIVERSAL POSTURE CORRECTOR**

Soft orthosis that exercises proprioception function for extension of the dorsal spine.

**Uses:** Increased dorsal kyphosis. Promote good dorsal posture.

**Characteristics of the product:** Thoracic support from T1 to T8 with side supports for the dorsal spine. Oval dorsal area. Polyester laminated. Ropes in the form of eight with movable protectors. Padded.

**Care:** When starting the treatment use the orthosis for 2 to 3 continuous hours increasing every day until you make it a habit. Hand wash with cold water and mild soap. Do not use detergent. Do not machine wash.

Size	Ref
Universal	KM900

**ERGONOMIC POSTURE CORRECTOR**

Soft orthosis that exercises proprioception function for extension of the dorsal spine.

**Uses:** Increased dorsal kyphosis. Promote good dorsal posture.

**Characteristics of the product:** Thoracic support from T1 to T8 with ergonomic amplitude in the lower dorsal area. Polyester laminated. Ropes in the form of eight with movable protectors. Padded.

**Care:** When starting the treatment use the orthosis for 2 to 3 continuous hours increasing every day until you make it a habit. Hand wash with cold water and mild soap. Do not use detergent. Do not machine wash.

Size	Ref
S/M	KM901
L/XL	KM902

**DORSO-LUMBAR BRACE**

Soft Orthosis that partially limits the movements of the dorso-lumbar spine.

**Uses:** Dorso-lumbar pain, dorsal-lumbar spondylarthrosis, dorsal sprain and/or lumbar sprain, back muscle strain, scoliosis of less than 25 degrees.

**Characteristics of the product:** soft and resistant cotton fabric, anatomical lumbar support to provide stability. It maintains abdominal support with its dual elastic closure.

Size	Ref
SM	KM103
MD	KM105

Size	Ref
LG	KM107
XL	KM108
XXL	KM109

**CHILD POSTURE CORRECTOR**

Soft orthosis that acts as a proprioception for the extension of the spine.

**Uses:** Promote good dorsal posture.

**Características del producto:** Characteristics of the product: It consists of two left and right pieces, which are placed on each shoulder doing a traction backwards in a crossed way and carrying it forward, velcro closures This form does a cross traction on the back to keep the shoulders back, correcting the bad postur.

Size	Ref
S/MD	KM910
L/XL	KM909

\*The colors of this reference may vary.

**CAMP TYPE LUMBAR BRACE**

Soft Orthosis that partially limits the movements of the lumbar spine further improving the functionality of the abdominal muscles.

**Uses:** back pain, lumbar spondylarthrosis, lumbar sprain, muscle tear in the lumbar area, scoliosis of less than 25 degrees, lumbar disc disease, minor lumbar herniated disc, and lumbar spine postoperative care.

**Characteristics of the product:** Made of polyester laminates, hypoallergenic and breathable, reinforced with latex-free elastic bands, with velcro closures, posterior vertical rods, crown to rump measurements.

**SIMPLE LUMBAR BRACE**

Soft Orthosis that partially limits the movements of the lumbar spine further improving the functionality of the abdominal muscles.

**Uses:** low-back pain, lumbar spondylarthrosis, lumbar sprain, muscle Tear in the lumbar region.

**Characteristics of the product:** Made with latex-free elastic, X-shaped reinforcement in the back, contact closures. Very comfortable.

Size	Ref	Size	Ref
SM	KM033	XL	KM038
MD	KM035	XXL	KM039
LG	KM037		

**ABDOMINAL BINDER**

Soft orthosis that helps the pressure exerted by the abdominal muscles.

**Uses:** Post-operative ventral hernia, abdominal post-operative support at this level, epigastric and large umbilical hernia, post-partum to improve functionality of the abdominal muscles.

**Characteristics of the product:** Made of latex-free elastic, X-shaped back reinforcement, hook and plush closures, a traumatic special sewing.

**INDUSTRIAL BELT**

Orthosis with lumbar support and elastic closures that provide abdominal support.

**Uses:** Prevention and comfort to the user, in repetitive tasks of moving and transporting of loads, body posture correction. It prevents disc herniation and/or muscle tears at the lumbar level. Back pains and body mechanics.

**Characteristics of the product:** Anatomical design that combines textiles and elastics, with velcro closure and polypropylene rods that provide support to the alignment of the lumbar spine.

Size	Ref
S / M	KM100
L / XL	KM101

**PREGNANCY SUPPORT BRACE**

Lumbar orthosis to treat and prevent back pain during pregnancy.

**Uses:** For the relief of back pain during pregnancy, placenta previa, overweight and threatened abortion.

**Characteristics of the product:** Ergonomic design, consists of three parts:

- 1) Kangaroo: Raises and distributes weight throughout the lumbar region.
- 2) Lumbar brace: Provides support to this region avoiding hyperlordosis and severe back pain.
- 3) Elastic on the top: With velcro on the ends to attach to the lumbar brace.

Size	Ref
Universal	KM800

**MATERNITY BELLY BAND**

Orthosis for the weakness of the abdominal muscles. Supports the womb during pregnancy.

**Uses:** Pregnancy with flabby abdominal wall and other obstetric indications.

**Characteristics of the product:** Soft laminated with contact closures, raises the lower abdomen, helping to support the weight.

Size	Ref
Universal	KM810

**RIB BELT**

Costal orthosis for immobilizing the rib cage.

**Uses:** Fractured ribs, thoracic muscle tears.

**Characteristics of the product:** Resistant and plushy elastic material to prevent skin lacerations, with contact closures.

Size	Men	Woman
S / M	17151B	17161B
L / XL	17150B	17160B

**INGUINAL JOCK STRAPS**

Inguinal orthosis to prevent hernias and eventrations at this level.

**Uses:** preoperative inguinal hernias.

**Characteristics of the product:** Elastic belt with polyurethane supports with bilateral anatomical design.

Size	Ref
SM	KM213
MD	KM215
LG	KM217

**SCROTAL ATHLETIC SUPPORTER**

Orthosis that helps the suspension of the testicle at scrotal level.

**Uses:** Post-operative of varicocele. Diseases with increased scrotal or testicular size.

**Characteristics of the product:** Made of soft and resistant cotton laminates, latex-free elastics.

Size	Ref
SM	KM013
MD	KM015
LG	KM017

**SPORT AID SUSPENSORY**

Orthosis to raise the testicles during vigorous or sport activity.

**Uses:** Testicular protection in sport activities.

**Characteristics of the product:** Band at the waist with soft and resistant cotton laminate.

Size	Ref
SM	KM113
MD	KM115

# ARM AND ELBOW ORTHOSE

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[kamexinternational.com.co](http://kamexinternational.com.co)

### SIMPLE SLING WITH STRAPS

Orthosis for forearm support.

**Uses:** To support the plaster cast of the forearm in case of fractures and trauma of soft tissues in shoulder and elbow.

**Characteristics of the product:** Light design to provide patient comfort, ropes with the possibility of varying height and neck protector to prevent lacerations.

Size	Ref
Universal	KM2300

### SIMPLE SLING

Orthosis for forearm support.

**Uses:** Shoulder and elbow fractures, post-operative care, soft tissues injuries.

**Characteristics of the product:** Ergonomic design made of resistant denim, soft protector on the collar to prevent lacerations and ropes with contact closures for easy placement.

Size	Ref	
Pediatric	KM2001	
Children	KM2002	
Adults	KM2000N	

### ELBOW SUPPORT

Elbow orthosis for the treatment of soft tissue injuries and mild sprains.

**Uses:** Muscle Strains, tendonitis and sprains.

**Characteristics of the product:** Airpren case that allows perspiration, provides therapeutic heat and helps proprioception.

Size	Ref	
	Blue	Black
SM	18313A	18313N
MD	18315A	18315N
LG	18317A	18317N
XL	18318A	18318N

### TENNIS ELBOW RING

Tennis elbow orthosis in circular form to put pressure on the muscle belly of the fingers and wrist extensors.

**Uses:** Prevention and primary treatment of epicondylitis or golfer's elbow.

**Characteristics of the product:** Band in airpren, distal to the elbow with circular reinforcements and contact closures.

Size	Ref	
	Blue	Black
S / M	18320A	18320N
L / XL	18321A	18321N

### TENNIS ELBOW

Elbow orthosis as a coadjutant in the treatment of lateral epicondylitis.

**Uses:** Epicondylitis, tendinitis and muscle strains at elbow level.

**Characteristics of the product:** Perforated neoprene cover with anatomical design that allows skin perspiration. The distal band allows vibration absorption.

Size	Ref

# HAND AND WRIST ORTHOSES

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[kamexinternational.com.co](http://kamexinternational.com.co)

**SIMPLE WRISTBAND**

Circular orthosis over the wrist that provides compressive support.

**Uses:** Helps relieve pain through pressure on the injured wrist. Tendonitis.

**Characteristics of the product:** Made of airpren with contact closure that ensures a comfortable fit and stability during work or sport activity.

Size	Ref	
Universal	Blue	KM300A
	Black	KM300N

**WRISTBAND**

Orthosis that provides compression and support for weak or injured wrist.

**Uses:** Degenerative arthropathy, tendonitis, soft tissue injury at the level of the thenar eminence. Acute and chronic inflammation of the joints. Carpometacarpal and intercarpal.

**Characteristics of the product:** Made of airpren, bandage type, flexible, with thumb hole that allows it to be ambidextrous. Retains heat, which can help and accelerate the recovery process.

Size	Ref	
	Blue	Black
SM	18300A	18300N
MD	18301A	18301N
LG	18302A	18302N

**WRIST BRACE**

Wristband with palmar splint for immobilizing the wrist joint.

**Uses:** Carpal tunnel syndrome. Tendonitis.

**Characteristics of the product:** Aluminum wrist splint in functional position, coated with airpren that helps to reduce the pressure rise in the carpal tunnel.

Size	Ref
Right Plus	18490NM
Left Plus	18491NM
Right Universal	18480NM
Left Universal	18481NM

**PADDED WRIST BRACE**

Wristband with palmar splint for immobilizing the wrist joint.

**Uses:** Carpal tunnel syndrome. Tendonitis.

**Characteristics of the product:** Aluminum wrist splint in functional position, coated with laminated cotton and polyester that helps to reduce the pressure rise in the carpal tunnel.

Size	Ref
Right Universal	18480BA
Left Universal	18481BA

**THUMB ABDUCTION SUPPORT WRISTBAND**

Orthosis maintaining thumb abduction, which counteracts adduction contracture, common in metacarpal osteoarthritis.

**Uses:** metacarpophalangeal and carpometacarpal osteoarthritis. Rheumatoid arthritis. Post-traumatic situations. Hypermobilization. Extra efforts.

**Characteristics of the product:** Made of airpren with the thumb in abduction position. Provides flexible support that protects against extreme painful positions.

Size	Ref		
	Blue	Beige	Black
Universal	Blue	18600A	18600B
	Beige	18600B	18600N
	Black	18600N	

**THUMB SPLINT WRISTBAND**

Orthosis which helps support the wrist and the thumb, leaving the palm of the hand free.

**Uses:** Thumb sprains. Post-fracture of the hand. Carpalmetacarpal post-surgery.

**Characteristics of the product:** Aluminum splint in functional position and lateral aluminum splint to keep the thumb in abduction. Made of airpren with velcro fastening to improve stability during activity.

Size	Ref		
	Blue	Beige	Black
Right L / XL	18470A	18470B	18470N

Left L / XL	18471A	18471B	18471N
Left S / M	18461A	18461B	18461N

**SPICA WRIST BRACE**

Orthosis maintaining thumb abduction. Protects, immobilizes and limits the movement of the first finger.

**Uses:** Quervain tenosynovitis. Tendonitis, arthritis, sport injuries.

**Characteristics of the product:** Thumb immobilizer made of high strength injected foam, with padded inner lining and airpren strips that ensure a comfortable fit and stability in the activity.

Size	Ref
Right Universal	16100
Left Universal	16101

**FOREARM WRIST BAND**

Orthosis that allows stabilization of the forearm and the wrist.

**Uses:** Grade 1 or 2 wrist sprains. Post-fracture.

**Characteristics of the product:** long aluminum splint in functional position that covers up to the middle third of the forearm, covered with airpren compatible with velcro. Soft to the touch.

Size	Ref	
	Beige	Black
Right Universal	18500B	18500N
Left Universal	18501B	18501N

**DOUBLE WRISTBAND SPLINT**

Medium hold cane for treatment of wrist and metacarpal bone.

**Uses:** Soft tissue injury, wrist sprain accompanied by injuries in the base of the thumb.

**Characteristics of the product:** aluminum splint on the palmar and dorsal part (removable) of the hand and wrist, coated with padded material with velcro fasteners for better fit and immobilization.

Size	Ref

**CLOSED PATELLA KNEE SUPPORT**

Knee orthosis to prevent and treat mild knee sprains and soft tissues injuries.

**Uses:** Prevention and treatment of sport injuries, sprains and mild tendonitis at knee level.

**Characteristics of the product:** Case in airpren that allows perspiration, provides warmth and preventive and therapeutic support. Flexible to facilitate knee movements.

Size	Ref
SM	18623NM
MD	18625NM
LG	18627NM
XL	18628NM
XXL	18629NM

**OPEN PATELLA KNEE SUPPORT**

Knee Orthosis that helps to improve the patellofemoral alignment.

**Uses:** Patellofemoral mal-alignment, minor sprains and subluxation of the kneecap.

**Characteristics of the product:** Case in airpren that allows perspiration, with patellar hole to centralize the kneecap and relieves pressure on the femur.

Size	Ref
SM	18633NM
MD	18635NM
LG	18637NM
XL	18638NM
XXL	18639NM

**REINFORCED PATELLA KNEE SUPPORT**

Knee Orthosis that helps to improve the patellofemoral alignment, especially in the lateral and medial instability.

**Uses:** Intermittent instability of the patella.

**Characteristics of the product:** Case in airpren that allows perspiration. With round patellar cavity to place an attachment in horseshoe shape which can be moved medially or laterally depending on the pathology

Size	Ref

**SHORT KNEE SUPPORT FOR POST-OPERATIVE KNEE**

Articulated orthosis at knee level that allows movement from 0 to 90 degrees, and programmable flexion/extension.

**Uses:** Knee post-operative.

**Characteristics of the product:** Made of padded cotton and polyester laminates, with rigid side supports and programmable flexion/extension articulation. Contact closures. Length of 46.5 cm. It can be assembled and disassembled according to the patient's need.

Size	Ref
Universal	11230

**LONG KNEE SUPPORT FOR POST-OPERATIVE KNEE**

Articulated orthosis at knee level that allows movement from 0 to 90 degrees, and programmable flexion/extension.

**Uses:** Knee post-operative.

**Characteristics of the product:** Made of padded cotton and polyester laminates, with rigid side supports and programmable flexion/extension articulation. Contact closures. Length of 58.5 cm. It can be assembled and disassembled according to the patient's need.

Size	Ref
Universal	11000

**KNEE IMMOBILIZER**

Orthosis for blocking knee flexion, keeping it extended.

**Uses:** Post trauma or when complete immobilization of the knee is required.

**Characteristics of the product:** Made of padded cotton and polyester laminates, compatible with velcro, lateral and posterior splints with three movable panels which allow to adjust to various sizes, upper and lower bands to avoid slipping and allow adjustment.

Size	Ref
Short 16"	15110
Long 20"	15020
Children	15111

**ARTICULATED KNEE ORTHOSIS WITH BUFFER**

Orthosis with polycentric articulation and flexion/extension adjustment.

**Uses:** Sprains and knee instability.

**Characteristics of the product:** Case in airpren that allows perspiration. Patellar reinforcement and polycentric articulation with stopper pins of 0 to 90 degrees, programmable flexible/extension and bands of upper and lower adjustment to avoid sliding.

XL	18348A	18348N

The objective of the management of the knee after a ligament surgery or knee injury is to make the patient come back to his/her normal activity as soon as possible with a strong and healthy knee and free of pain.

Soft knee orthoses are designed to promote healing, reduce muscle atrophy, rotation under the plaster cast and collagen loss of ligaments. For post-surgical and non-surgical applications.

Articulated soft orthoses are designed to bring stability to an unstable or injured knee, allowing movement of pre-established and controlled range. The control clock allows to adjust flexion and extension movements with variations of 0°, 15°, 30°, 60°, 90° and free.

The attachment of velcro strips strategically placed provide maximum safety and the padded material provides convenience and comfort to the patient.

All our supports are made of breathable neoprene (Airpren) with perforation of 4mm to allow perspiration. Neoprene is the best existing bandage, increases circulation and improves healing.

A close-up photograph of a person's right foot and ankle wearing a black, textured, sleeve-like ankle brace. The brace covers the ankle and extends slightly up the lower calf and down the foot. The background is white, and a large blue diagonal shape is on the right side of the image.

**UNIVERSAL ANKLE SUPPORT**

Soft orthosis that helps to stabilize the foot instep.

**Uses:** post-exercise foot instep pain, minor sprains, post-plaster cast for stability during the recovery stage.

**Characteristics of the product:** Flexible bandage in airpren, allows perspiration. Full opening system which allows easy placement. Contact closure with velcro for a better adjustment.

Size	Color	Ref
Universal	Blue	18380A
	Beige	18380B
	Black	18380N

### STABILIZING LATERAL TENSOR ANKLE SUPPORT

Orthosis for stabilizing the foot instep movement.

**Uses:** Acute and chronic sprain of the foot instep. Instability of the foot instep. Prophylactic in sport activities.

**Characteristics of the product:** Made of neoprene with lateral bands in the form of eight to promote stability by preventing inversion and eversion. Use in athletic or street shoes.

Color	Ref
Blue	18390A
Beige	18390B
Black	18390N

### ANKLE BRACE WITH GEL

Orthosis for acute sprain, stabilizer of the foot instep movement that enables dorsiflexion of the foot, restricting eversion-inversion of the foot instep, and allowing to work with cold therapy.

**Uses:** acute sprain of the foot instep.

**Characteristics of the product:** Made with lateral splints of thermoformed polypropylene with removable gel inserts that must be kept in the freezer, for putting it back in the orthosis to manage edema.

Size	Ref
Universal	11200

### RIGID ANKLE BRACE

Orthosis for stabilizing the foot instep movement, allowing dorsiflexion of the foot and restricting eversion-inversion of the foot instep.

**Uses:** Grade II-III foot instep sprain.

**Characteristics of the product:** Made with lateral splints of thermoformed polypropylene with liners inside. Upper and lower adjustments with contact closures.

Size	Ref
Right S / M	11170
Right L / XL	11180
Left S / M	11171
Left L / XL	11181

### ANKLE BRACE WITH STABILIZING BOOT

Orthosis for stabilizing the foot instep movement

**Uses:** Acute and chronic sprain of the foot instep, instability of the foot instep. Prophylactic.

**Characteristics of the product:** Made of flexible and resistant soft mesh with anatomical design, front tongue in neoprene, side bands in the form of eight to promote stability by preventing inversion and eversion, use in athletic or street shoes.

Size	Ref

# FOOT ORTHOSES

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[kamexinternational.com.co](http://kamexinternational.com.co)

### BUNION CORRECTOR

Orthosis that leads the knuckle to abduction, keeping it aligned with the first metatarsal.

**Uses:** Night use for the treatment of Hallux Valgus (bunion) in the first phases of formation.

**Characteristics of the product:** Made of neoprene compatible with Velcro to provide comfort. Contact closures. Lateral splint.

Size	Ref	
	Derecha	Izquierda
Children	KM410	KM411
Adults	KM400	KM401

### POST-OPERATIVE BUNION CORRECTOR

Orthosis for stabilizing the first metatarsophalangeal movement of both, the abduction/adduction and the flexion/extension. movements.

**Uses:** Post-operative of correction of the Hallux Valgus (Bunion Correction).

**Characteristics of the product:** Made of padded cotton and polyester laminates, soft, velcro-compatible for comfort. Elastic back to prevent slipping. Adjustment bands with contact closures.

Size	Ref
Left	KM416
Right	KM415

### BOOT FOR PLASTER CAST ORTHOSES

Shoe for adjoining the lower limb plaster cast.

**Uses:** To obtain support of the walking plaster cast.

**Characteristics of the product:** Made of resistant denim and attached with rocket type rigid and anti-slipping sole and contact closures.

Size	Ref
XS	11111
SM	11113
MD	11115
LG	11117
XXL	11118

### POST-OPERATIVE SHOE ORTHOSES

Soft sole orthosis for foot surgery post-operative.

**Uses:** Foot and instep post-operative Arthritic foot.

**Characteristics of the product:** Made of quilted fabrics. Rocket type rigid and anti-slipping sole and contact closures.

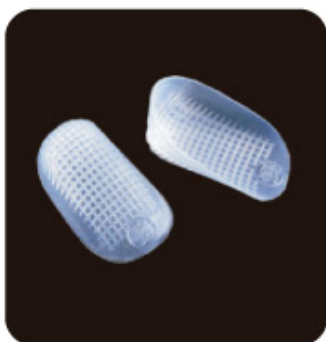

Size	Ref
XS	11141
SM	11143

# INSOLES

#### TULIS GEL STANDARD REGULAR

Low impact orthosis to absorb heel strike when walking.

**Uses:** Talalgias, tendonitis, overuse tiredness.

**Characteristics of the product:** Made of silicone gel with low impact ribs in a square grid patter.

Size	Measure	Ref
S / M	Regular	10215
L / XL	Large	10216

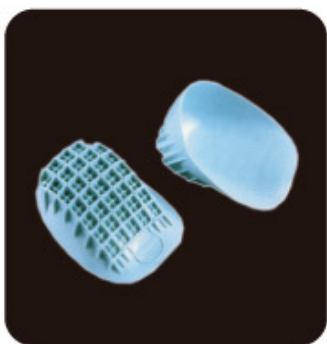

#### TULIS GEL HEAVY DUTY

High impact orthosis to absorb heel strike when walking.

**Uses:** Talalgias, tendonitis, calcaneal spur, overuse tiredness. Special for overweight patients. In athletes it avoids repetitive injuries.

**Characteristics of the product:** Made of silicone gel with high impact ribs

Size	Measure	Ref
S / M	Regular	10217
L / XL	Large	10218

#### GREEN TULIS

High impact orthosis to absorb heel strike when walking.

**Uses:** Talalgias, tendonitis, calcaneal spur, overuse tiredness. Special for overweight patients. In athletes it avoids repetitive injuries.

**Characteristics of the product:** Made of latex gel with high impact ribs in a square grid pattern.

Size	Measure	Ref
S / M	Regular	10212
L / XL	Large	10214

#### GAITORS INSOLES

Foot orthosis with scaphoid support and ramp to raise the metatarsal arch.

**Uses:** Flat feet, metatarsalgia. It helps maintain the internal arch of the foot and prevents the pressure of the metatarsal heads.

**Characteristics of the product:** Anatomical design with 3/4 of the length of the foot. Made with special polyurethane formulation and thermal insulation poron for greater comfort, coated with carbon for more firmness in the longitudinal arch. Heel pad with ribs for shock absorption.

INTERNATIONAL  
[kamexinternational.com.co](http://kamexinternational.com.co)

This polymer Gel of GelKam is composed of various medical grade polymers and mineral oils that moisturize and soften the skin. Effectively reduces decolorization and the thickness of old and recent keloid and hypertrophic scars, improving skin elasticity.

**DISTAL CUSHION COVER**

Tubular elastic protector coated with an inner gel pad to avoid Pressure and friction of the toes with footwear.

**Uses:** Calluses on toes. Arthritic fingers. Protect toes from Shoe rubbing and friction.

**Characteristics of the product:** Elastic ring with a polymer gel disk in the central part to be placed anywhere on the toes to avoid shoe friction.

**Presentation:** Pack of 5 Units.

Size	Ref
SM	401203
MD	401205
LG	401207

**JACK TYPE FINGER SEPARATOR**

Finger separator in polymer gel that prevents finger overlapping and interdigital friction.

**Uses:** Arthritis. Osteoarthritis. Congenital deformities of toes, Corns between the toes.

**Characteristics of the product:** Jack-shaped separator. It has high elasticity that allows it to adapt to the finger anatomy.

**Presentation:** Pack of 10 Units.

Size	Ref
S / M	406005
L / XL	406007

**REEL TYPE FINGER SEPARATOR**

Finger separator in polymer gel that provides comfort and finger alignment to avoid overlap.

**Uses:** Hallux Valgus or Bunion.

**Characteristics of the product:** reel-shaped finger separator. Flat and smooth top. Bottom with internal vacuum.

**Presentation:** Pack of 10 Units. / One-pair pack

Size	Ref
S/M	405003
L/XL	405005

**TOTAL GEL FINGER COVER**

Elastic thimble for hand and foot with polymer gel internal coating. Healing, partial digital amputation and hypersensitivity.

**Uses:** Hypersensitivity, total or partial digital amputation, burns, arthritic fingers.

**Characteristics of the product:** Elastic case entirely covered with gel.

**Presentation:** Pack of 5 Units.

Size	Ref
SM	401003
MD	401005
LG	401007

**OPEN TUBULAR CALLUS PROTECTOR**

Elastic tubular protector coated with gel to prevent pressure and friction of the hand or foot with footwear.

**Uses:** Calluses on fingers and toes.

**Characteristics of the product:** Case with inner lining in gel open at both ends.

**Presentation:** Pack of 5 Units.

Size	Ref
SM	401303
MD	401305
LG	401307

**BUNION PROTECTOR**

Elastic protector coated with gel to prevent pressure and friction of the bunion with footwear.

**Characteristics of the product:** Made of elastic mesh coated inside with gel, attached with a rubber band.

**Uses:** Hallux Valgus (bunion) pre and post-operative surgery.

**Presentation:** Unit

Size	Ref
SM	401103
MD	401105

**MOISTURIZING INSOLE**

Insole in polymer gel that provides cushioning and wetting to the foot.

**Characteristics of the product:** Insole made of stretch mesh and coated with polymer gel.

**Uses:** Dryness and plantar callosities.

**Presentation:** One-pair pack

Shoe size	Ref
35 - 36	409103
37 - 38	409105
39 - 40	409107
41 - 42	409108

**TOE CAPS**

Elastic toe cap in polymer gel that protects the foot from rubbing and friction.

**Characteristics of the product:** Toe cap made without internal stitches, coated inside with gel.

**Uses:** Metatarsalgia, diabetic foot.

**Presentation:** One pair-pack.

Size	Ref
S / M	403000

**METATARSAL FOOTPAD**

Protect for reducing metatarsal pressure and friction.

**Characteristics of the product:** Elastic pad with polymer gel Coated with mesh in the metatarsal area, holding ring on the second or third toe.

**Uses:** Metatarsalgia.

**Presentation:** One-pair pack

Size	Ref

### ABDOMINAL GEL

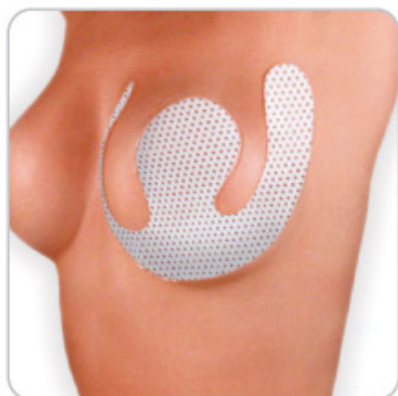

Polymer gel sheet, used in post-op abdominal area.

**Uses:** Lipectomies. Cesareans. Abdominal surgeries.

**Characteristics of the product:** Semi-circular non-sterile arc gel in the shape of half-moon of 2mm thickness with support mesh, easy to cut to size or necessary shape.

Size	Ref
S/M	430004
L/XL	430001

**Presentation:** Unit

### ANCHOR SHAPE BREAST GEL

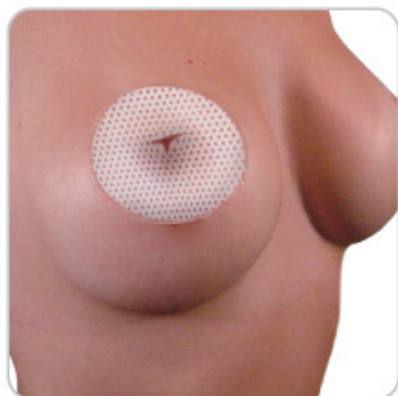

Polymer gel film used in post-operative breast.

**Uses:** Mammoplasty by reduction of bust size.

**Characteristics of the product:** Its anchor shape allows it to adapt to the contour of the breast. Polymer gel with 2mm thickness. Not sterile.

Size	Ref
Universal	433242

**Presentation:** Package one pair

### AREOLA SHAPE GEL

Polymer gel film used in post-operative breast.

**Uses:** Mammoplasty due to enlargement of the breasts.

**Product features:** 2mm thick polymer gel. Pre-cut circular shape with hole in the center for the nipple. Not sterile.

Size	Ref
Universal	430002

**Presentation:** Package by pair

### EYE MASK

Polymer gel mask, used in post-operative blepharoplasty.

**Uses:** Reduce edema and provide elasticity in the postoperative blepharoplasty.

**Characteristics of the product:** It contains two units: 1) Gel in the form of a 3mm thick mask to be placed in the refrigerator for cryotherapy in the immediate post-operative period. 2) Gel in the form of a 2mm thick mask with support mesh and fastening tapes to give elasticity to the eyelid. Not sterile.

Size	Ref
Universal	430000

**Presentation:** Package one pair

**POLYMER GEL FACE MASK**

Total polymer gel face mask with holes for the eyes, nose and mouth

**Uses:** Facial burns. Dermatological treatments.

**Characteristics of the product:** Total gel mask of 3 mm thickness with supporting mesh. Indicated for facial burns, hypertrophic scars and keloids.

**Presentation:** Unit per Pack

Size	Ref
Universal	430005

**PRESSURE RELIEF LAYER**

Polymer gel layer that relieves the pressure on the skin in patients with long periods in bed or in a wheelchair or use of orthopedic appliances.

**Uses:** Lumbosacral and trochanteric pressure areas.

**Characteristics of the product:** Matte polymer gel layer with mesh of 30x40 centimeters long which covers any surface. It can be cut to desired size. Non-sterile.

**Presentation:** Unit

Size	Ref
Universal	409534

**CRYSTAL GEL WITH MESH AND WITHOUT MESH**

Polymer gel layer with variety of sizes for each patient's need. Washable, can be cut, reusable. Should be secured with adhesive tape to skin.

**Uses:** To reduce keloid and hypertrophic scars. Improve healing processes after the removal of the sutures. Moisturize and soften the skin.

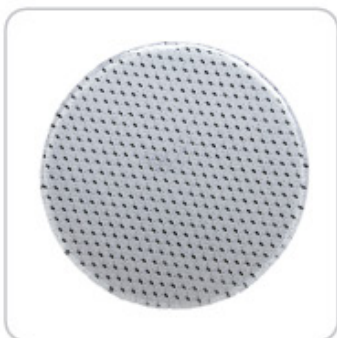

**Characteristics of the product:** Layers with mesh are used in homogeneous or easy placing areas. Layers without mesh allow greater fixation in the oints and require a full coating to avoid tangling in clothing. Non-sterile.

### DISTAL PAD 100 mm

Polymer gel disc that relieves distal pressure in lower limb amputations.

**Uses:** Lower limb amputations.

**Characteristics of the product:** Polymer gel disc with mesh, thickness of 5mm and diameter of 100mm diameter, for use within the socket.

**Presentation:** Unit

Size	Ref
100mm x 5mm	408115
100mm x 10mm	408116

### CARPAL TUNNEL GLOVE

Glove coated with polymer gel in the front to avoid friction and rubbing, reduces the risk of keloid or hypertrophic scar.

**Uses:** Postoperative of Carpal Tunnel Surgery.

**Characteristics of the product:** Lycra glove with gel pad in the form of eight with 5mm thickness.

**Presentation:** Unit

[kamexinternational.com.co](http://kamexinternational.com.co)

**HIP ABDUCTOR CUSHION**

External orthosis that helps to keep the affected lower limb in a 45° position after surgery maintaining the stability of the prosthesis.

**Uses:** Total hip replacement post-operative. Hip dislocation.

**Characteristics of the product:** Orthosis in high density injected foam with anatomical design that allows to keep hip abduction, with side channels that allows to align the legs in a horizontal position and fastening through two plush bands with contact closure.

Size	Ref
Universal	KM150

**COCCYX CUSHION**

Orthosis that allows to relieve the pressure in the area in seated position. It prevents bedsores in pressure zones.

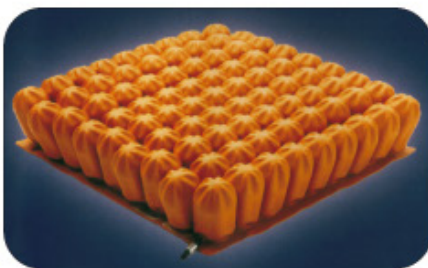

**Uses:** Pain in the hip joint, dislocated coccyx, hemorrhoids, sores in the coccyx area.

**Characteristics of the product:** Made of high density foam with a central hole. Elastic Lining.

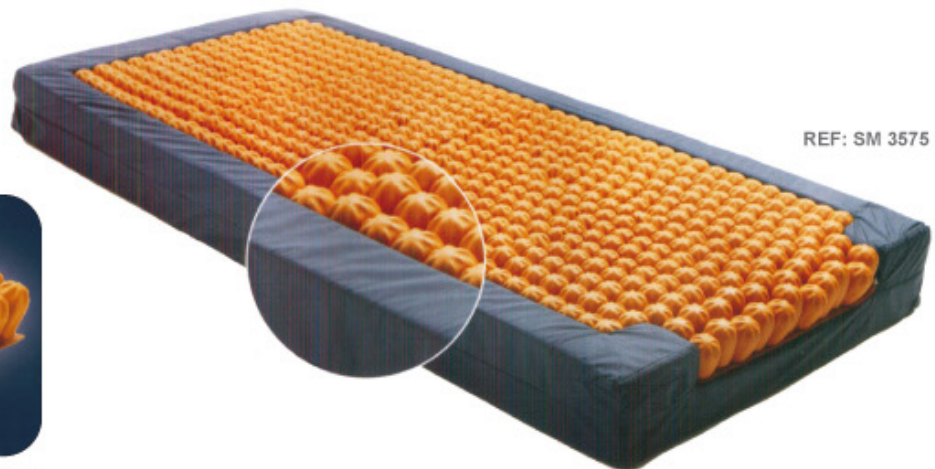

Size	Ref
Universal	KM020

## ANTISCARAS CUSHION

*inGel*

Abductor Block  
(Comfort Gel)

Gel surface that minimizes pressure <

High density foam <

Made of waterproof material <

Interdigital Modules

**Anti-bedsore cushion\*** made of comfort foam, with polymer gel, interior cover impermeable to fluids and outer cover with side zippers that facilitates removal for cleaning.

Gel in interdigital modules, with spaces between them that allow the distribution of the weight in the pressure zones. The waterproof covers that protect the foam and gel, give greater durability to the structure of the cushion. Ideal for patients who stay for long periods of time in a sitting position or patients with pressure ulcers.

\*In the Gel Comfort cushion reference, abductor block is added for patients with spasticity

### ANKLE SUPPORT

Ankle support to immobilize in-hospital agitated patients.

**Use:** Unconscious, neurological patients, or under the effects of anesthesia.

**Characteristics of the product:** Made of padded laminated cotton to avoid lacerations, resistant rope with ring that allows correct fastening.

Size	Ref
Children	KM606
Adults	KM604

### CHIN WRAP

The band adjusts to the chin allowing the mouth to be closed during the night and reduces annoying sounds.

**Indications and Contraindications:**

This band is not suitable for people suffering from sleep apnea, adenoids and different chronic respiratory diseases.

Size	Ref
Universal	DK-0012

**SKIN TRACTION**

Orthosis to exert pressure on the femur allowing axial alignment.

**Uses:** Femur or hip fractures.

**Characteristics of the product:** Made of padded laminated cotton and polyester to provide comfort and avoid lacerations. With mobile side splints to fit any size. Back aluminum support with laces to fix the weights.

Size	Ref
Children	KM031
Adults	KM030

**EMERGENCY IMMOBILIZERS RIGID ORTHOSIS**

**IMMOBILIZER OF UPPER AND LOWER LIMB**

REF: DK-0008

**USE:** Temporary immobilization, in case of fractures or injuries in the upper and lower limb.

\*In case the situation needs it, use the two immobilizers on the legs.

**Contraindications and warnings:** Use the device correctly to immobilize, read the instructions correctly. Do not wash, Single use only.

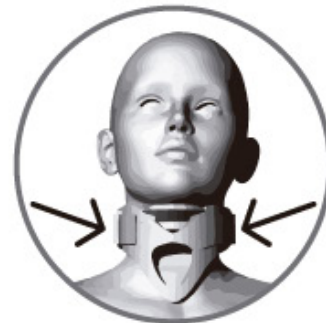

**RIGID IMMOBILIZING NECK ORTESIS**

**USE:** Temporary immobilization in case of fractures or injuries in the cervical spine.

**Contraindications and warnings:** Use the device correctly to immobilize, read the instructions correctly. Do not wash Single use only.

**ANTI-FLUID PROTECTOR**

Mattress protector for home or hospital use for patients suffering incontinence or that excrete other fluids that can contaminate bed sheets.  
**Uses:** For patients without sphincter control or with surgical drains and children in the process of sphincter education.  
**Characteristics of the product:** Laminated cotton with waterproof protector to prevent fluids from passing through to the mattress.

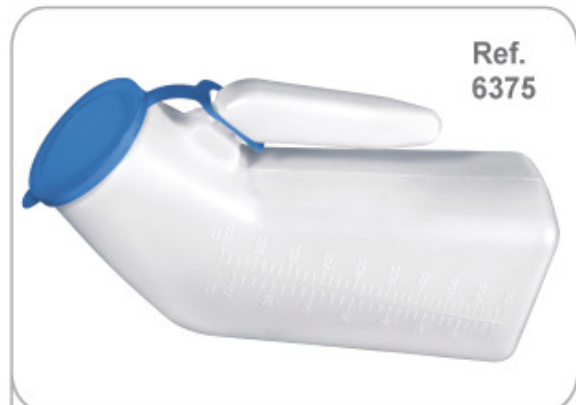

Size	Ref	Dimensions
Pediatric	KM139	1.46cm x 83cm
Adults	KM131	73cm x 83cm

Ref.  
6351

**STOOL COLLECTION DEVICE:**

A urine and stool collection device for women.  
**Uses:** Collection of stool and urine for bedridden patients hospitalized or at home.  
**Characteristics of the product:** Injection of high strength plastic, Hygienic and individualized.

Ref.  
6375

**MALE URINAL:**

Container for collecting urine of patients inside and outside the hospital.  
**Uses:** To collect urine and measure volume of liquid of the patients.  
**Characteristics of the product:** Made of durable plastic with meters in cubic centimeters and plastic lid to avoid bad odors and urine spillage.

# REHABILITATION

### Elastic Bands

Elastic bands used for rehabilitation and physical fitness, which allow to develop and strengthen muscles and increase mobility levels and flexibility.

### Tubing

- Elastic and resistant exercise tube.
- Available in multiple levels of resistance.

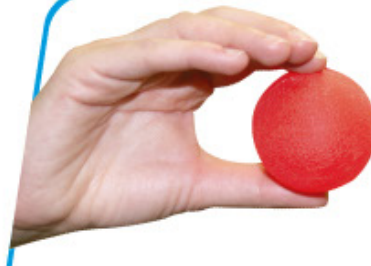

### Hand Finger Exerciser

- Develops strength, flexibility and coordination in each finger.
- It helps to strengthen hands and forearms.

### Therapeutic Plasticine

- Plasticine for hands exercise.
- Each color has a different level of harness.
- Gluten free, latex and casein. Nontoxic. It does not dry.

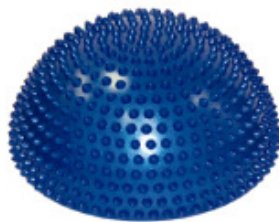

### Exercise Gel Ball

- Ideal in exercises of strength, pressure, dexterity, mobility and fine and gross motor.
- Available in several levels of hardness and sizes.

### Stretch Straps

- Gradual stretching.
- Exclusive double pocket system for a balanced stretch.
- The dual-purpose strap supports both static and dynamic stretching.

### Rocker

- It can be used to practice and reinforce coordination, proprioception and balance.
- Filling with water or sand for stability.
- Use with the curved side down for vestibular training.

### Therapeutic Balls

- Improves balance, coordination, flexibility and strength.
- Used by therapists as support for vestibular movement, balance therapy, stretching and strength.
- Inflation can be soft and mild, or firm and flexible.

### Weights

- Flexible to fit perfectly to the ankle, wrist and even the thigh.
- High strength and double stitching, make this a durable option. Levels of weight coded by color.
- It can be hung on any weight support

## Blood Pressure Monitors

Hypertension is a disease that is highly dangerous and requires care.

Blood pressure can be altered for different reasons; some of them can be internal and others external to our own organism.

The most common are: Variation in the frequency of heartbeats, stress situations and salty food.

## Nebulizers

**Adults**

**Children**

Medications administered by nebulizer can treat acute conditions or prevent developing respiratory problems.

Unlike systemic medications, which require time to travel through the gastrointestinal tract through the bloodstream, nebulizers are coadjuvants in the administration of drugs directly to the respiratory tract.

## Vaporizers

The vaporizer serves for moisture and hydration to the air, and is ideal to preserve a warm temperature, apt to indirectly help bronchial dilation.

Both forms (nebulizer or vaporizer) have precise indications, if you want to apply a medication, you must use a nebulizer, or else the vaporizer is convenient.

INTERNATIONAL  
[© kamexinternational.com.co](http://www.kamexinternational.com.co)

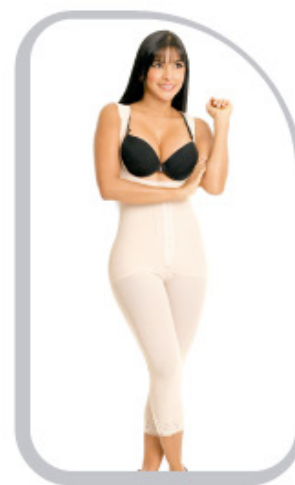

# Girdles

Garments made in Powernet of medium compression, designed for daily use, have flat seams that do not mark the skin or are marked on the clothes, fastenings with a badge (plush) or zipper, soft biases, lined in lycra that give softness to the contact with the skin. The girdles shape and enhance the figure, exert compression in different areas of the body, helping to correct posture in some situations, enhance glutes and bust.

# CUSHIONS & PILLOWS

**Kamex**<sup>®</sup>  
INTERNATIONAL  
[© kamexinternational.com.co](http://kamexinternational.com.co)

## PILLOWS AND CUSHIONS FILLING

- **Viscoelastic pillow:** its adaptability gives you an anatomical posture, it is ideal for people with a tendency to bad postures during sleep.
- **Pillow with silicone hollow fiber Fiberfill Pillows:** the touch of this type of pillows is soft and pleasant. It is ideal for allergic people, since it can be washed, it guarantees a completely hygienic rest.
- **Pillow with polyurethane foam:** This type of pillow or cushion is firm, for good alignment of the cervical or lumbar spine, which allows to keep the spine in anatomical position.
- **Pillow with microbeads:** Impact absorption capacity and lightness.

**Care Of The Pillows With Viscoelastic Foam:** For the care of these pillows remove the lining. Wash the liner by hand with cold water and mild soap; Do not use detergent and do not wash in a washing machine.

**Viscoelastic Foam** Made of medium density memory foam, which allows an ergonomic adaptation, decreasing pressure points.

**CLASSIC PILLOW (Conventional head pillow)**

Pillow that allows rest of the cervical spine in a comfortable way when supporting the head.

**Uses:** Neck pain, cervical tiredness.

**Characteristics of the product:** Made of medium density foam with memory. Washable lining.

1 Ref. KM025 Measures: 64cm long x 41cm wide.

2 Ref. KM070 Measures: 50cm long x 30cm wide.

Almohada Junior

**TRAVEL PILLOW (Memory pillow)**

Multipurpose pillow for use in different parts of the body.

**Uses:** To avoid the pressure of the knee and foot when resting in lateral position. Support the infants head.

**Characteristics of the product:** Made of medium density foam with memory.

3 Measures: 34cm long x 23cm wide. Ref: KM023

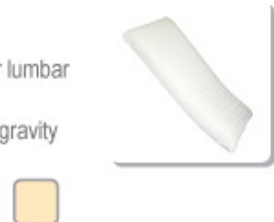

**BODY PILLOW (Body Positioning Pillow)**

Pillow that positions the body in bed in prone, supine or lateral positions, preventing bedsores.

**Uses:** Patient in abdominal and lumbo-dorsal surgery postoperative and patients with thrombosis, cervical or lumbar spinal cord trauma, patients requiring permanent rest in bed.

**Characteristics of the product:** Made of medium density foam with memory, reducing the action of the antigravity muscles and avoiding muscle spasms. Washable lining.

4 Ref: KM024 Measures: 85cm long x 30cm wide

**SWEET DREAMS PILLOW**

These Pillow allows the resting of the cervical spine in a comfortable way when lying.

**Uses:** cervicalgia, cervical fatigue.

**Characteristics of the product:** Made of medium density memory foam. Washable cover.

5 Ref: KM028 Measures: Long 70cm x Wide 50cm

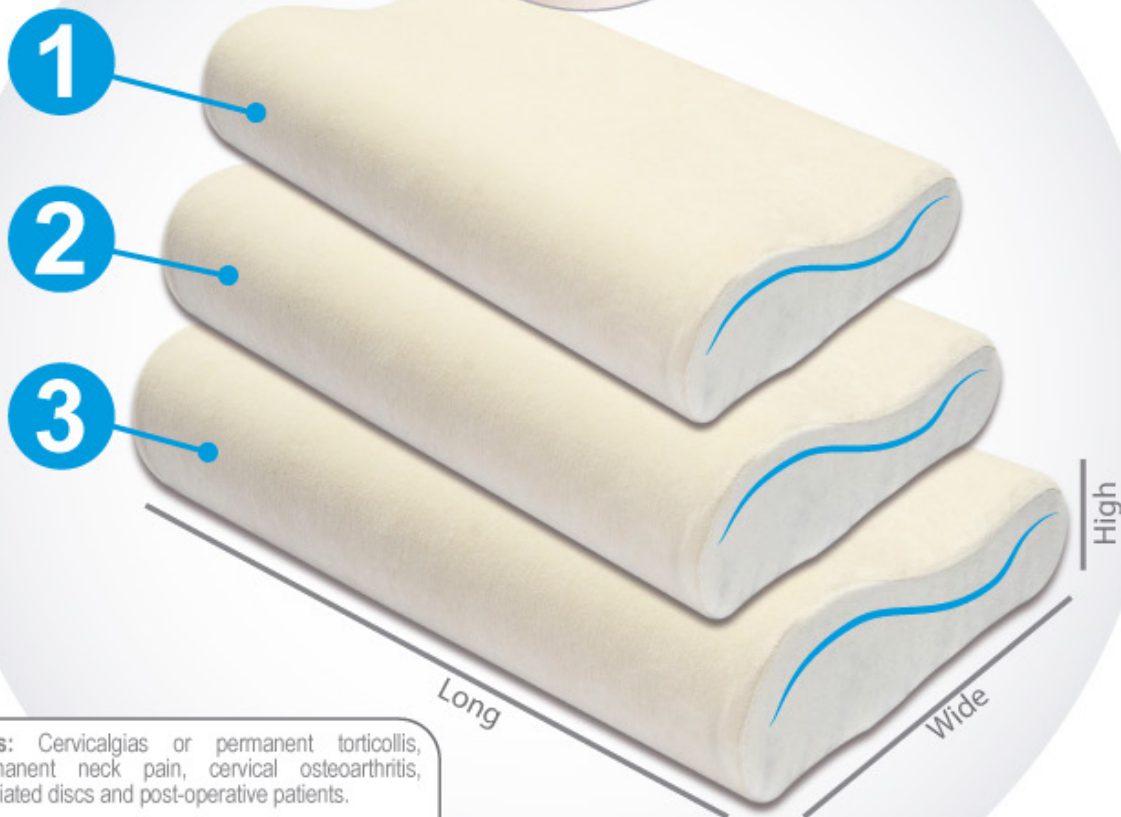

## ERGONOMIC PILLOWS (Viscoelastic Foam)

This pillow allows the proper positioning of the cervical vertebrae, as if the person was standing. Designed to prevent neck pain and discomfort caused by poor postures during sleep.

Made of medium density memory foam, which allows an ergonomic adaptation, decreasing pressure points.

**Uses:** Cervicalgias or permanent torticollis, permanent neck pain, cervical osteoarthritis, herniated discs and post-operative patients.

**Liner care:** To wash the liner, remove it, wash by hand with cold water and mild soap. Do not use detergent. Do not wash in washing machine. Do not iron, nor twist for drying. Dry in the shade. The foam should not be washed.

### COMFORT PILLOW (Conventional head pillow with memory)

Pillow for greater cervical comfort when supporting the head.

**Uses:** Chronic neck pain, lengthy cervical postures in the same position.

**Characteristics of the product:** Made of medium density foam, with memory, reducing the action of the antigravity muscles avoiding muscle spasms. Washable lining.

**Measures:** 55cm long x 40cm wide. **Ref. KM026**

1

### 4" ROLL

Pillow in roll form useful for the support of different body segments.

**Uses:** Shoulder pain, back pain, neck pain, hip pain. For patients with thrombosis and spinal cord injuries or paralysis of the arms and/or legs.

**Characteristics of the product:** Made of medium density foam with memory that allows ergonomic adaptation, reducing pressure points. Washable lining.

**Measures:** 50cm long x 10cm diameter. **Ref. KM021**

2

### 6" ROLL

Pillow in roll form useful for the support of different body segments.

**Uses:** Shoulder pain, back pain, neck pain, hip pain. For patients with thrombosis and spinal cord injuries or paralysis of the arms and/or legs.

**Characteristics of the product:** Made of medium density foam with memory that allows ergonomic adaptation, reducing pressure points. Washable lining.

**Measures:** 40cm long x 15cm diameter. **Ref. KM022**

3

### REST CUSHION (Viscoelastic)

**Product characteristics:** Made of medium density memory foam.

**Measures:** Long 38cm x Wide 41cm **Ref. KM029**

4

SILICONE HOLLOW FIBER

**1** CERVICAL CUSHION

Silicone Hollow Polyester

Ref.1011000 Measures: Long 38 cm x Wide 41 cm

**2** MAXI PLUS PILLOW

Multipurpose pillow that can be used in different parts of the body. Made of silicone hollow polyester.

**Product characteristics:**

Fresh, anatomical, durable and does not lose shape.

Ref. KM102 Measures: Long 70 cm x Wide 50 cm

**CERVICAL PILLOW**

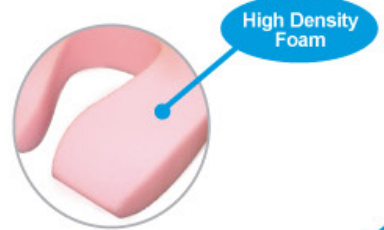

Orthosis for good alignment of the cervical spine, which allows to keep the cervical spine in anatomical position.

**Uses:** Arthritis. Cervical arthrosis. Neck pain. Muscle tension. Cervical level post-operative.

**Characteristics of the product:** Orthosis made of high density injected foam. Cylindrical shape that adapts to the cervical area. Elastic, washable and durable cotton liner.

Ref. KM060

Size: Universal

**ERGONOMIC BACK SUPPORT AND SEAT CUSHION**

Orthosis that allows to keep the functional position of the spine. Column preserving the physiological curves.

**Uses:** Scoliosis. SlideShare. Kyphosis. Lumbago. Back pain. Occupational health prevention.

**Characteristics of the product:** Made of high-density injected foam, wedge-shaped, with handles for easy placement.

Referencia: KM010

Size: Universal

## Microbeads

Fabric that provides great mobility and comfort. It is filled with an innocuous material made from the molding of pre-expanded polystyrene pearls filled with air.

**Product characteristics:** Impact absorption capacity and lightness.

### REST ROLL PILLOW

Its design is based on a roll shape for its disposition on the shoulders and behind the neck. It provides a better rest at bedtime. Comfortable design that fits the anatomy of the body. Manufactured from the molding of pre-expanded polystyrene pearls filled with air.

Multiple color options

Ref. MC101

Ref. MC102

### BREASTFEEDING PILLOW

U-shaped support cushion that adapts to the body. It adapts to the baby's body providing comfort while resting on it, while resting on the mother's legs, which allows her to have a better posture when breastfeeding.

Makes the feeding process more comfortable for both the mother and the baby.

Multiple color options

Ref. MC103

### TRAVELING PILLOW

Its design is based on an arched structure for its disposition on the shoulders and behind the neck. Provides a padded support to relax the head. Practical, functional and easy to carry. Ideal for a long car or airplane travels.

Multiple color options

Ref. MC104

### ABDOMINAL REST CUSHION

Support to read, breastfeed or watch television. Its U-shaped design adapts to the body to provide a better rest at bedtime. Keeps the neck, shoulders, back and hip aligned at any time of the day and night. The cushion adapts to the anatomy of the body and helps support the mother's belly during pregnancy.

Multiple color options
