

Assembly Instructions for

Connecting Kits for Stands, Spacers/Hoods, and Utility Units

Thank you for purchasing one of our Maximum Reptile[™] Stands, Spacers/Hoods or Utility units.

These instructions will walk you through how to add the connecting pins so that the upper item will not slide out of place.

Before you begin, make sure that you have all the parts necessary. If you notice anything missing, or if anything has sustained damage upon delivery, please let us know before proceeding with assembly.

In each kit you should find the following items.

- Tube of silicone
- 8 x metal pins
- 4 x template stickers for the bottom unit
- 4 x template stickers for the upper unit
- 1 x 3/16" drill bit
- 1 x 1/4" drill bit

Please note for most uses we recommend to just add the front two metal pins as this will prevent the top unit from sliding as if all 4 pins are used. It is also a little easier to place the upper unit onto the lower unit.

Tools needed –Electric drill and small hammer for the pins.

1. Place the 3/16th Upper/Top template stickers onto the 2 front corners and then repeat for the 2 back corners (if using the back pins). Be sure to keep the templates perfectly lined up with the plastic corners.

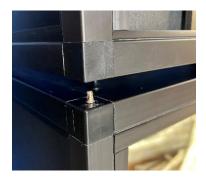

2. Now add the 3/16th drill bit and drill into the plastic corner, making sure the drill is as vertical as possible, so that the pins are as straight as possible.

3. Remove the templates once all the holes are drilled and then add the steel pins into the 3/16th holes. They should be tight so this is where you may need the hammer to tap them in place.

4. Now you can add the $\frac{1}{2}$ " Lower/Bottom template stickers to the corresponding plastic corners on the bottom of the unit that will sit onto the steel pins. Drill out the holes with the larger $\frac{1}{2}$ " drill bit so that this part will now sit over the steel pin as shown.

CONGRATULATIONS - you have now secured your Maximum Reptile™ components.

We thank you for your patronage. Should you run into any issues or have questions regarding this assembly, please feel free to reach out to our customer service team for assistance.
