

#### **AXDSPL-BM1** INSTALLATION INSTRUCTIONS

#### **INTERFACE COMPONENTS**

- AXDSPL-BM1 interface
- AXDSPL-BM1 interface harness
- AXDSPL-BM1 vehicle T-harness
- Bass knob

#### APPLICATIONS

Visit AxxessInterfaces.com for current application list

## BMW/MINI DSPL Interface for Non-Amplified Vehicles with Pre-Wired Harness 2008-2016

#### **INTERFACE FEATURES**

- Includes a DSP (Digital Signal Processor)
- Selectable 15 Band Graphic EQ or 5 Band Parametric EQ
- 4 inputs and 6 individually assignable outputs
- Independent equalization for front, rear, and sub
- Selectable low pass, band pass, and high pass filters
- Selectable crossover slopes; 12db, 24db, 36db, 48db
- Each channel can be delayed independently up to 10ms
- Clipping detection and limiting circuits
- Designed for non-amplified models
- · Easy behind the radio installation with pre-wired harness
- Internal header port for adding interface modules
- Bass knob included for level control of subwoofer amp
- Settings adjusted via Bluetooth® in a smart device application (tablet or mobile phone), compatible with both Android and Apple devices
- Read, write, and store configurations for future recall
- Password protect feature available in the mobile app
- USB Micro-B updatable

#### **TOOLS & INSTALLATION ACCESSORIES REQUIRED**

- Crimping tool and connectors, or solder gun, solder, and heat shrink Tape Wire cutter
- Zip-ties Multimeter

**Google Play Store** 

## **INSTALLATION OPTIONS**

#### Adding a subwoofer to a factory system:

The diagram on **Page 3** shows the connections that need to be made to add a subwoofer to the factory system.

Note: RCA jacks sold separately.

#### Adding a full-range of amps & subwoofer to a factory system:

The diagram on **Page 4** shows the connections that need to be made to add: Subwoofer (RCA jacks sold separately).

Amplifier (SPDT relay **E-123** required) or Additional Amp (RCA jacks sold separately).

#### 16-pin header port:

Inside the interface is a 16-pin header port for adding optional modules (sold separately). Pages 5 and 6 will show the installation and use of these modules.

- AXDSPL-BT Bluetooth streaming interface
- AXDSPL-SP Toslink digital output

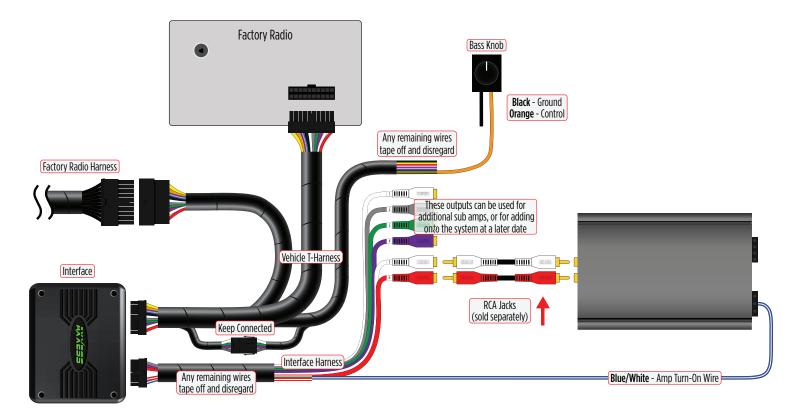

**Note:** The interface provides a 12-volt 1-amp output to turn on aftermarket amp(s). If installing multiple amps, an SPDT automotive relay will be required if the amp turn-on current of all amps combined exceeds 1-amp. Use Metra part number <u>E-123</u> (sold separately) for best results.

## INSTALLATION

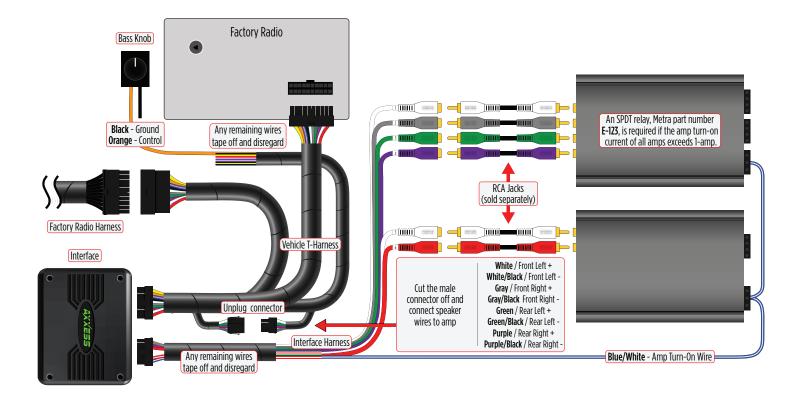

- 1. Disassemble the dash, unplug all connectors, and then remove the factory radio.  $^{\dagger}$
- Install the AXDSPL-BM1 vehicle T-harness to the vehicle and make all necessary connections, but leave the amp turn-on wire disconnected.
- 3. Plug the AXDSPL-BM1 vehicle T-harness to the AXDSPL-BM1 interface.
- 4. Plug the AXDSPL-BM1 interface harness to the AXDSPL-BM1 interface.
- Download and install the AX-DSP-XL app from the Google Play Store or Apple App Store.
- 6. Cycle the ignition on.
- **7.** Open the app then select the **Bluetooth Connection** tab. Follow the instructions to pair the mobile device to the interface. Refer to page 7 for more information.
- Scroll to the Configuration tab then select the vehicle type. Press the Lock Down ‡ button to save the configuration. Refer to page 8 for more information.
- 9. Connect the amp turn-on wire.
- **10.**Adjust the settings in the app as desired. Press the **Lock Down** <sup>‡</sup> button to save any new configurations.
- For dash disassembly instructions, refer to metraonline.com. Enter the year, make, and model of the vehicle in the Vehicle Fit Guide and find instructions under Metra Radio Install kits.
- ‡ Anytime the interface is locked down the key must be cycled off then back on.

### **CONNECTIONS: ADDING A SUB TO A FACTORY SYSTEM**

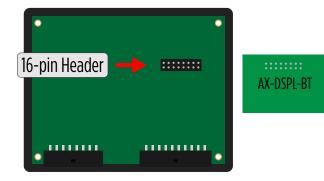

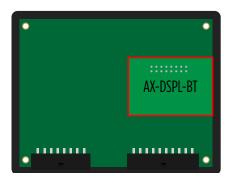

## **CONNECTIONS: ADDING A FULL-RANGE AMP & SUB TO A FACTORY SYSTEM**

## **BLUETOOTH STREAMING INTERFACE**

- The **AXDSPL-BT** Bluetooth streaming interface can be used to stream media directly to the interface.
- While streaming media the volume on the phone will be used. As an option, the **AXBK-1** (sold separately) can be used to control the volume.

**Note:** The bass knob included with the **AXDSPL-BM1** can be used if it will not be used to control a subwoofer.

- **1. Important!** Unplug the interface from the vehicle.
- **2.** Remove (4) Phillips screws securing the interface, then remove the top cover, exposing the circuit board within.
- **3.** Locate the 16-pin header on the circuit board.
- 4. **Important!** Referencing how the **AXDSPL-BT** is laid out in the picture, carefully line up the header pins to the interface. Gently press down to secure.

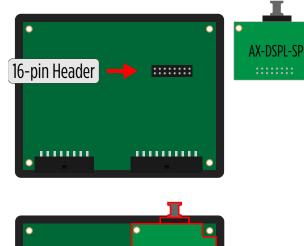

**Note:** Both interfaces may be damaged if installed incorrectly.

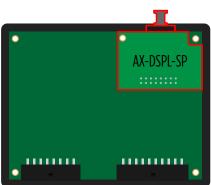

**5.** Re-secure the top cover using the (4) Phillips screws previously removed to complete the installation.

#### **AXBK-1 Installation:**

6. Connect the **Brown** wire from the interface to the **Orange** wire from the **AXBK-1**. Ground the **Black** wire from the **AXBK-1** to the chassis.

## **TOSLINK DIGITAL OUTPUT**

- The AXDSPL-SP Toslink digital output can be used for adding a digital output to the interface.
- **1. Important!** Unplug the interface from the vehicle.
- **2.** Remove (4) Phillips screws securing the interface, then remove the top cover, exposing the circuit board within.
- **3.** Locate the 16-pin header on the circuit board.
- 4. Important! Carefully line up the header pins to the **AXDSPL-SP**, with the Toslink port facing outward. Gently press down to secure.

**Note:** Both interfaces may be damaged if installed wrong.

**5.** Re-secure the top cover provided with the **AXDSPL-SP** using the (4) Phillips screws previously removed to complete the installation.

	ific harness, install the A ie inputs of the AX-DSP. T o the amplifier inputs.		
right), and Subwoofer.		, , ,	
Detailed installation ir the instructions.	nstructions are available (	R A T	tton below to view

#### **Bluetooth Connection**

• General information tab for installing the interface.

 Scan - Press this button to start the Bluetooth pairing process, then select the Available Device once it is found. "Connected" will appear in the top left corner of the app once paired.

**Note:** The ignition must be cycled on during this process.

• **Disconnect** - Disconnects the interface from the app.

## Configuration

**IDENTIFY:** Click this button to confirm that the interface is connected properly. If it is, a chime will be heard from the front left speaker.\*

\* Only installations where the interface is connected to a front left speaker.

SETUP INSTR	UCTIONS	BLUETOOTH CONNECTION CONFIGURATION		OUTPUTS	
CROSSOVER	ADJUST	EQUALIZER ADJUST	DELAY ADJUST	INPUT/LEVELS	
IDENTIFY	Click this bu	ton to identify the AX-DSP; the c	himes will play		
RESET TO DEFAULTS	Resets the DSP customization settings, will not reset vehicle type. During the reset proc amplifiers will shut off for 5–10 seconds, and then turn back on once completed.				
VEHICLE TYPE	Select the type of vehicle the AX-DSP is installed in				
EQ TYPE	Sets the type of Equalizer - Graphic or Parametric				
EQTIFE	Sets the typ	e of Equalizer - Graphic or Param	etric		
LOCK DOWN		of Equalizer - Graphic or Param urrent configuration into the AX-I			
	Stores the c		DSP		
LOCK DOWN	Stores the c	urrent configuration into the AX-I	DSP		
LOCK DOWN	Stores the c Saves the cu Recalls a co	urrent configuration into the AX-I rrent configuration to your devic	NSP e		

**RESET TO DEFAULTS**: Resets the interface to factory settings. During the reset process the amplifiers will shut off for 5-10 seconds.

VEHICLE TYPE: Select the vehicle type from the drop down box, select EITHER

**EQUALIZER (EQ) TYPE**: User has the option of optimizing the car's sound quality with a Graphic or Parametric equalizer.

LOCK DOWN: Click this button to save the selected settings.

**Attention!** This button must be selected before closing the app or cycling the key; otherwise, all settings will be lost.

SAVE CONFIGURATION: Saves the current configuration to the mobile device.

**RECALL CONFIGURATION:** Recalls a configuration from the mobile device.

ABOUT: Displays information about the app, vehicle, interface, and mobile device.

**SET PASSWORD**: Assign a 4-digit password to lock the interface. If no password is desired, use "0000". This will clear out any currently set password. It is not necessary to lock down the interface when setting a password.

**Note:** A 4-digit only password must be chosen; otherwise, the interface will show "password not valid for this device".

## **Outputs**

	SETUP INSTRUCTIONS		BLUETOOTH CONNECTION		CONFIGURATION	OUTPUTS	
	CROSSOVER ADJUST		EQUALIZER ADJUST		DELAY ADJUST	INPUT/LEVELS	
			Output Chann			<u>els</u>	
#	Location		Group				
1	Left Front	-	None	•	lnve	ert Mute	
2	Right Front	-	None	-	lnve	ert Mute	
3	Left Rear	-	None	-	lnve	ert Mute	
4	Right Rear	-	None	-	Inve	ert Mute	
5	Sub Woofer	-	None	-	Inve	ert Mute	

#### **Output Channels**

- Location Location of speaker.
- **Group** Used to join channels together for simple equalization. Example, left front woofer/midrange and left front tweeter will be considered simply left front. The letter **M** indicates the speaker assigned as the master speaker.
- **Invert** Will invert the phase of the speaker.
- Mute Will mute desired channel(s) for tuning individual channels.

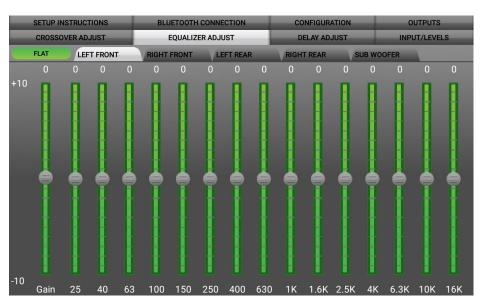

- Selecting High Pass and Low Pass will provide one crossover frequency adjustment. Selecting Band Pass will provide two crossover frequency adjustments: one for low pass, and one for high pass.
- Select the desired crossover slope per channel, 12db, 24db, 36db, or 48db.
- Select the desired crossover frequency per channel, 20hz to 20khz.

**Note:** The front and rear channels default to a 100Hz high pass filter to keep the low frequency signals out. If a subwoofer is not being installed, change the front and rear crossover points down to 20Hz for a full range signal, or to the lowest frequency the speakers will play.

**Equalizer Adjust** 

#### **Graphic EQ**

- All channels can be adjusted independently within this tab with 15 bands of available equalization. It is best to tune this by using an RTA (Real Time Analyzer).
- The **Gain** slider on the far left is for the channel selected.

## **MOBILE APP**

Connected to BC-DSP-X Metra 311B527	- (-78)	WARNI	NG: Settings have	changed - Make sure	to 'Lock Down' before Exiting App
SETUP INSTRUCTIONS		CONNECTION		GURATION	OUTPUTS
CROSSOVER ADJUST	EQUALIZE	R ADJUST	DELAY	ADJUST	INPUT/LEVELS

Q: •••••••	1.0 Q: 🌘		1.0	Q:	1.0
Freq: •	1.0 KHz Freq:	)	2.0 KHz	Freq:	6.0 KHz
Gain:	+0.0 dB Gain: 💼	•••••••	+0.0 dB	Gain:	+0.0 dB

Each output has a **5 Band parametric EQ** per channel. Each band will give the user the ability to adjust:

Q Factor

Frequency Gain

dalli

The **FLAT** button above **Filter #1** will reset all curves back to flat.

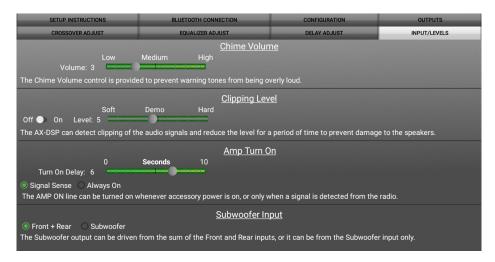

## **Delay Adjust**

SETUP INSTRUCTIONS		BLUETOOTH CONNECTION	CONFIGURATION	OUTPUTS
CROSSOVER ADJUST		EQUALIZER ADJUST	DELAY ADJUST	INPUTS/LEVELS
Left Front Right Front Left Rear Right Rear Sub Woofer	0 0 0 0 0	Distance from each speaker to 'H	<u>ead' position (in inches)</u>	
Measure the distance f	rom eacl	n speaker to the desired 'Head' position a distance is 99		esponding boxes. Maximum

• Allows a delay of each channel. If a delay is desired, first measure the distance (in inches) from each speaker to the listening position, then enter those values to the corresponding speaker. Add (in inches) to the desired speaker to delay it.

## Inputs/Levels

- Chime Volume Not applicable in this application.
- Clipping Level Use this feature to protect sensitive speakers like tweeters from being driven past their capabilities. If the output signal of the interface clips, the audio will be reduced by 20dB. Turning down the stereo will allow the audio to come back at a normal level. The sensitivity of this feature can be adjusted to the listening preference of the user.

#### • Amp Turn On

- **Signal Sense** Will turn the amp(s) on when an audio signal is detected, and keep on for (10) seconds after the last signal. This ensures the amp(s) won't shut off between tracks.
- Always On Will keep the amp(s) on as long as the ignition is cycled on.
- Turn on Delay Can be used to delay audio output to avoid turn-on pops.
- Subwoofer Input Select Front + Rear or Subwoofer input depending on preference.

## **Locking Down Data**
