

# MBT-RX

---

## BLUETOOTH® AUDIO RECEIVER

### **Pairing your device (required for operation):**

1. Ensure your streaming device has Bluetooth® enabled and that power is applied to the MBT-RX. (The blue LED on the MBT-RX will blink to indicate it is in pairing mode.)
2. Within your streaming device's Bluetooth® setup menu, select "MBT-RX" from the list of pairable devices.
3. When successfully connected, the Blue LED on the MBT-RX will stop blinking and remain lit. A single beep will be heard through the connected audio system.

Multiple devices can be paired to the MBT-RX, but only one streaming device can connect at one time.

The MBT-RX will remember the last device that was connected to it and reconnect with it automatically. If that streaming device is not active, then other paired streaming devices can connect manually, or new streaming devices can be paired.

When a connected streaming device is out of range for more than one minute, the MBT-RX will automatically disconnect this streaming device and return to pairing mode (LED will blink).

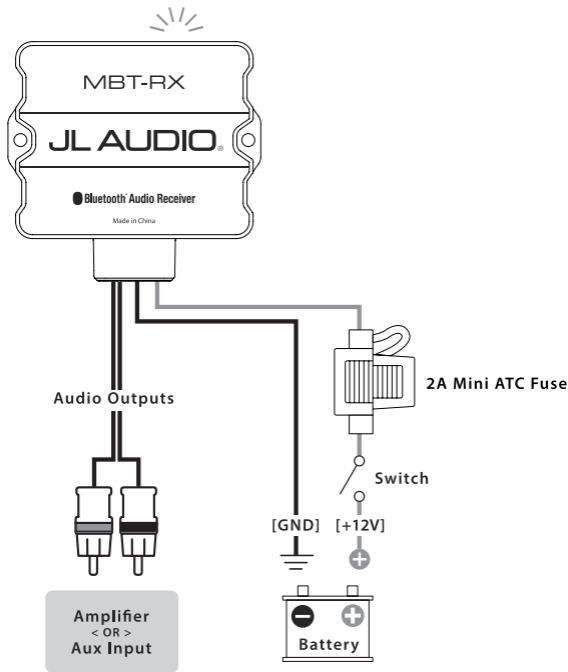

### **Controlling audio playback:**

1. Once connected, audio is controlled from the streaming device. This includes volume and media selection.
2. The MBT-RX can be installed out of sight, as it has no user controls that need to be accessed.

## LED Power Indicator

**Blinking:** Pairing Mode (ready to connect to Bluetooth® device)

**On:** Bluetooth® Device connected
