

Stealthbox®

INSTALLATION GUIDE for the

SB-N-XTERR2/12W3v3

SKU# 94270

2005 - Up Nissan Xterra

Thank you for choosing a JL Audio Stealthbox® for your automotive sound system. With proper installation, your new vehicle-specific enclosed subwoofer system will deliver years of listening pleasure.

We strongly recommend that you have your new Stealthbox® installed by your authorized JL Audio dealer. The installation professionals employed by your dealer have the necessary tools and experience to disassemble and reassemble your vehicle properly. Also, keep in mind that your warranty coverage extends to 1 year if your system is installed or approved by your authorized JL Audio dealer. If you prefer to perform your own installation, please read this installation guide completely before beginning the process.

! IMPORTANT

If you choose to perform the installation yourself, it is absolutely vital that the Stealthbox® be properly mounted to the vehicle according to these instructions. Failure to mount the enclosure properly presents two problems:

- 1) The sub-bass performance will suffer due to the movement of the enclosure caused by the force exerted by the woofer(s).
- 2) A loose enclosure presents a serious safety hazard in the event of a collision or sudden deceleration.

INSTALLATION DIFFICULTY:

2 OUT OF 5

STEP 1

Apply the supplied wax square to the floor of the passenger side cargo area. As shown in the picture.

STEP 2

Thread in the supplied socket cup set screw into the bottom of the Stealthbox®, leaving 1/4-inch exposed. Place the Stealthbox® into place and press down firmly.

STEP 3

Remove the Stealthbox® from the mounting area. You will notice an impression on the wax square. With a 1/2-inch drill bit, drill at the impression. Drill through the plastic and metal flooring.

Note: Before drilling, make sure that you are not going to be drilling into any gas lines, brake lines, transmission lines, electrical wiring, transfer case (4x4 vehicles) or anything else that might cause a reduction in your weekly pay. Always wear eye protection when drilling!

STEP 4

With a Unibit or 3/4-inch drill bit, enlarge the 1/2-inch hole in the plastic flooring to 3/4-inch. Place the 1/2-inch spacer into the 3/4-inch hole.

STEP 5

Place the Stealthbox® into the cargo area. Run speaker wire from the amplifier location to the Stealthbox® and attach to the terminal.

Back out the socket cup set screw, on the bottom of the Stealthbox®. Leaving 1-1/2 inches exposed.

Place the Stealthbox® into the mounting area. Carefully guiding the socket cup set screws through spacer and the drilled hole.

STEP 6

From under the vehicle, place the supplied fender washer, flat washer, lock washer and then hex nut onto to the exposed socket cup set screw.

Secure the bolt assembly.

Note: For added protection it is recommended that you apply a bead of silicone between the vehicle and the fender washer. After the bolt assembly is tightly secured, it is also recommended that vehicle undercoating material is applied to the exposed assembly.

CONGRATULATIONS

You have completed the installation for this model!

Please refer to the Power Recommendation section for an amplifier recommendation and basic set-up help.

INCLUDED HARDWARE

- | | |
|---------------------------------|--|
| (1) 3" x 3" Wax Square | (1) 3/8 - 16 x 2-1/4" Socket Cup Set Screw |
