

WALL PLAY™

BY GOLD LEAF DESIGN GROUP

Heights

Repeat, combine, and cluster styles to offer more texture. Layering Wall Play™ can create interest, complexity, and depth. Creating complex depth begins with the lowest profile shape as the bottom layer, being mindful of the width. Continue with the medium height Wall Play™ to add bulk while also being mindful of the width. The final layer is the cherry on top. This top layer allows the component to hover above the bottom and middle layers, adding complex dimension.

Tadpole, Daisy, Daffodil, and the tall sizes of Fig and Parasol are perfect for the top layer.

Caution. Wall Play™ has sharp screws. Product is not made for use by children.
