OPTION 1. Measure using your existing ring

1. Place your existing ring on top of each circle until you find a perfect match (see **Ring Size Chart**).
2. The circle should fit **INSIDE** the ring.
3. Select the ring size. Always size down if you don't find the perfect match.

OPTION 2. Measure using our Ring Size Tool (or a piece of string)

1. Cut the **Ring Sizing Tool** (or use a piece of string). Then position the wider end on the bottom of your finger. For a more accurate measurement, you can use a piece of sticky tape to hold the wider end in place.

2. Wrap the tool snug around your finger, keeping it in place where you would wear a ring.

3. Your ring size is the number that the arrow points to.

4. If the arrows is between sizes, always choose the smaller of the two numbers closest to the line.

RING SIZING TOOL

If you are measuring your finger with a piece of string, use it in the same way as the tool and hold one end on the arrow, and the other end will mark your ring size.

IMPORTANT TIP:

If you are between two ring sizes, **always size down.**
