

ALGAE GOLD
Ayurvedic concentrate
of pure marine algae extracts
125mL

ALGAE GOLD

AYURVEDIC CONCENTRATE OF PURE SEAWEED EXTRACTS, ESPECIALLY ELABORED TO OBTAIN BIG BUDS

PRODUCT DESCRIPTION:

ALGAE GOLD is an Ayurvedic concentrate of natural algae with high contents in mannitol (2.32%), alginic acid (6.96%), natural cytokinin (2,000 ppm) and vitamins naturally present in this ayurvedic concentrate obtained only by low temperature water extraction.

When you use **ALGAE GOLD**, you'll see:

1. Higher growth intensity:
 1. Improved nutrient absorption.
 2. Rapid emergence of new buds.
2. Immediate visible effect:
 1. Increased leaf density.
 2. Greener, healthier leaves.
 3. Plants of exceptional appearance thanks to natural vitamins.
3. Significantly increased yields:
 1. Continuous growth stimulation.
 2. Flowering boost.
 3. Balanced plants.

WHEN IS IT DESIRABLE TO APPLY ALGAE GOLD?

1. Every week to keep the plants stimulated and balanced.
2. When plants are in stressful situations.
3. When you want to improve the absorption of nutritional elements through its adjuvant effect.
4. To restore unbalanced plants.
5. To provide additional growth in specific situations.
6. To provide a supplement of vitamins and trace elements.

APPLICATIONS:

ALGAE GOLD is applied on a weekly basis or in specific situations where plants need additional support for their growth.

1. Leaf application:
 1. Weekly applications: 1mL/liter of sprayed water. From the third week of cultivation until the end of the cycle.
 2. Extra applications: 2mL/liter of sprayed water

2. Irrigation applications:
 1. Weekly applications: 2mL/liter of irrigation water. From the third week of cultivation until the end of the cycle.
 2. Extra applications: 3mL /Liter of irrigation water

3. Hydroponics:
 1. Weekly applications: 1.5 mL/liter of circulating water. From the third week of cultivation until the end of the cycle.
 2. Extra applications: 2.5 mL/liter of circulating water

All YUKHA products, except those from the PROTECTIVA range, can be used in combination with each other without any inconvenience up to a maximum of 3 products in the same broth.

Note that maintaining a neutral but slightly acid pH is essential for the application of these products, so it is necessary to maintain the broth pH between 6 and 6.5.

Keep products in their original packaging, well closed and protected from direct sunlight. These storage conditions will allow YUKHA products to have a shelf life of 24 months from the date of opening the container.

The YUKHA team advises to not exceed the recommended dosages of application to avoid plant physiological imbalances.

MORE INFORMATION ABOUT ALGAE GOLD

FORMULA DESCRIPTION:

ALGAE GOLD is obtained through cold water extraction processes to protect the stability and effectiveness of high levels of mannitol, alginic acid and cytokinins that are naturally present in algae.

The active ingredients of **ALGAE GOLD** come exclusively from algae that are used for extraction without any addition. It is therefore a 100% natural plant product, and so we are assured that your applications are completely free of animal or chemical elements.

FORMULATION CHARACTERISTICS:

ALGAE GOLD stimulates budding, balanced growth and the development of a powerful flowering.

ALGAE GOLD contains a balanced cytokinin (kinetin) content that incredibly improves nutrient mobilization to plant growth points, stimulates cell division (growth) and actively helps plants overcome different types of stress, both biotic (caused by living organisms such as insects and fungi), and abiotic (drought, excess moisture...), conferring greater resistance against aging plant tissues (degradation of chlorophyll).

ALGAE GOLD is rich in natural vitamins that help plants grow in a healthy and balanced way.

ALGAE GOLD also has adjuvant effects, improving application efficiency:

1. Wetting effect: spreads droplets on the surface of leaves, roots, and substrates, improving the ability of applications to recover.

2. Increased the adhesion of application droplets on leaves, roots, and substrates.

3. Moisturizing effect: prevents crystallization of applications, avoiding the rapid dehydration of solution droplets on the leaves until the active ingredients are absorbed.

The sum of all the effects of **ALGAE GOLD** makes it possible to obtain healthy and balanced plants, leading to a drastic improvement in the quantity and quality of crops (improved performance).

“Improving the balance and physiological state of plants thru applying natural vegetal active ingredients means increasing the quantity and quality of final production without compromising on your own health...”
