

ISOVEDIC-V
Vegetal organic matter
Concentrated in organic acids
125mL

ISOVEDIC-V

PLANT ORGANIC MATTER HIGHLY CONCENTRATED IN ORGANIC ACIDS

PRODUCT DESCRIPTION:

ISOVEDIC-V is a 100% plant-based Ayurvedic formulation with a high organic content (45%) which is combined with 2.5% organic acids and an NPK 3.5-1-1 balance.

When using **ISOVEDIC-V** you can observe:

1. Optimal Restoration of the Structure:
 1. Improvement and optimization of the structure of soils and substrates.
 2. Increased water retention capacity of soils and substrates.
2. Instant absorption improvement:
 1. Optimization of the absorption potential of nutritional elements.
 2. More structured and efficient roots.
3. Effect on microbial life:
 1. Balance in the development of beneficial organisms from the first application.
 2. Organisms act with roots to improve growing conditions.

WHEN IS IT APPROPRIATE TO APPLY ISOVEDIC-V?

1. Weekly as an improved soil structure.
2. Weekly to increase water retention capacity.
3. Weekly as an enhancer of microbial life.
4. Weekly to avoid choking problems.
5. To unlock in-efficient roots in a timely manner.
6. To get plants out of stress and growth blockage situations in a timely manner.

APPLICATIONS:

ISOVEDIC-V is applied on a weekly basis to improve soil and substrate conditions or to solve possible plant stress situations.

1. Foliar spray:
 1. Weekly applications: 2.5mL/Liter of spray water. One time per week throughout the growing cycle.
 2. Corrective applications: 3mL/Liter of spray water.

1. By irrigation:
 1. Weekly applications: 5mL/Liter of irrigation water. One time per week throughout the growing cycle.
 2. Corrective applications: 6mL/Liter of irrigation water.

2. Hydroponics:
 1. Weekly applications: 3mL/Liter of circulating water. One time per week throughout the growing cycle.
 2. Corrective applications: 4mL/liter of circulating water.

All YUKHA products, except those from the PROTECTIVA range, can be used in combination with each other without any inconvenience up to a maximum of 3 products in the same broth.

Note that maintaining a neutral but slightly acid pH is essential for the application of these products, so it is necessary to maintain the broth pH between 6 and 6.5.

Keep products in their original packaging, well closed and protected from direct sunlight. These storage conditions will allow YUKHA products to have a shelf life of 24 months from the date of opening the container.

The YUKHA team advises to not exceed the recommended dosages of application to avoid plant physiological imbalances.

MORE INFORMATION ABOUT ISOVEDIC-V

DESCRIPTION OF THE FORMULATION:

ISOVEDIC-V is formulated by fermentation processes in 5 different phases of 3 species of tubers (potato type) that are grown exclusively in southwestern India and grown in the soil that is sheltered from the palm trees of the forest.

In extraction processes, no chemical is used that can affect the fully organic integrity of this product. And the origin of raw materials is exclusively vegetal. So when applying **ISOVEDIC-V** you can be sure that you are not using ingredients of animal or chemical origin.

FORMULATION FEATURES:

The Ayurvedic **formulated ISOVEDIC-V**, with its high content of organic matter, helps to improve the structure of soils and organic culture media, increasing the water retention capacity, so it will not be necessary to water so often, because both soil and organic culture media will act as a reservoir of water.

Since the first application of **ISOVEDIC-V** the ability to assimilate the nutritional elements of soil (or substrate) or applied nutritional solution, is drastically improved, as the organic acids present in this formulation facilitate the assimilation of nutrients, reducing the energy that plants must use for this process.

It should also be noted that **ISOVEDIC-V** contributions in soil promote and improve the condition and development of beneficial organisms found naturally in both soils and organic growing media.

Finally, the addition of 3.5-1-1 helps with the input of NPK that plants need for their correct growth and best of all, it is completely ORGANIC.

“Improving the balance and physiological state of plants thru applying natural vegetal active ingredients means increasing the quantity and quality of final production without compromising on your own health...”
