

**PROTECTIVA-E**  
100% natural protection against fungi  
125mL

# PROTECTIVA-E

## 100% NATURAL PROTECTION AGAINST FUNGUS ESSENTIAL BASIC SUBSTANCE

### PRODUCT DESCRIPTION:

**PROTECTIVA-E** is a pure 100% vegetable Ayurvedic concentrate, with a great protection effect against fungal diseases that can be used as a preventive treatment or in curative treatments once fungal infections have been detected.

When using **PROTECTIVA-E** you can observe:

1. Drastically reduced residues of chemical fungicides:
  1. Completely natural product.
  2. Reduction of toxic residues in your crops.
  3. Respect for plant health and consumer health.
2. Powerful preventive effect:
  1. Systematic circulation within the plant.
  2. Protective thickening of cell walls.
  3. Plants protected against fungal infections.
3. Intense healing power:
  1. Systemic movement of the product within the plant to the affected areas.
  2. Effective fight against any type of fungal infection.
  3. Healthy and clean fungal plants within a few days from starting treatment.

### WHEN IS IT APPROPRIATE TO APPLY PROTECTIVA-E?

1. Weekly as a preventative of fungal infections.
2. As a curative treatment against the main fungi: fusarium, mildew, etc.

### APPLICATIONS:

**PROTECTIVA-E** is applied preventively (before the first symptoms of infection appear) or curatively (once the first symptoms of the infection are visible).

1. Foliar spray:
  1. Preventive treatment: 0.5mL/Liter of foliar spray water. Every 5-7 days from the second week of cultivation until the end of the cycle.
  2. Healing treatment: 1mL/Liter of foliar spray water. Once the first symptoms have been detected, 3 applications with an interval of 4 days.

2. By irrigation:
  1. Preventive treatment: 0.5mL/Liter of irrigation water. Every 5-7 days from the second week of cultivation until the end of the cycle.
  2. Healing treatment: 1mL/Liter of irrigation water. Once the first symptoms have been detected, 3 applications with an interval of 4 days.
3. Hydroponics:
  1. Preventive treatment: 0.5mL/Liter of circulating water. Every 5-7 days from the second week of cultivation until the end of the cycle.
  2. Healing treatment: 1mL/Liter of circulating water. Once the first symptoms have been detected, 3 applications with an interval of 4 days.

All YUKHA products, except those from the PROTECTIVA range, can be used in combination with each other without any inconvenience up to a maximum of 3 products in the same broth.

Note that maintaining a neutral but slightly acid pH is essential for the application of these products, so it is necessary to maintain the broth pH between 6 and 6.5.

Keep products in their original packaging, well closed and protected from direct sunlight. These storage conditions will allow YUKHA products to have a shelf life of 24 months from the date of opening the container.

The YUKHA team advises to not exceed the recommended dosages of application to avoid plant physiological imbalances.

## MORE INFORMATION ABOUT PROTECTIVA-E

### FORMULA DESCRIPTION:

**PROTECTIVA-E** is a pure concentrated extract obtained by maceration and decoction of the aerial part of 2 different shrub species that are grown in India for this purpose ancestrally.

Among the main active materials of **PROTECTIVA-E** we can find some that are well known for their effect of protection of fungal diseases: Phenols, Flavonoids, Salicylic Acid and Coffee, although they are not the main active materials of this formula.

You can be completely sure that **PROTECTIVA-E** is free of animal and chemical ingredients. It's a 100% plant-based product.

### FORMULATION FEATURES:

**PROTECTIVA-E** is an Ayurvedic basic substance that has an incredible protective effect against fungal diseases with 2 main effects:

1. Preventive effect: applied from the second week of growth on a regular basis has a thickening effect of the cell walls of plants making it difficult and preventing fungi from passing through and triggering the infection.
2. Healing effect: applied once the infection is established in plants, through the effect of salicylic acid and a combination of saponins that are toxic to fungi, the healing of the infection is achieved.

As it is an Ayurvedic plant formulation, plants recognize and assimilate it immediately, and together with its systemic uniqueness, plant protection processes are rapidly initiated.

**“Improving the balance and physiological state of plants thru applying natural vegetal active ingredients means increasing the quantity and quality of final production without compromising on your own health...”**
