125mL

# PROTECTIVA-U

**PROTECTION AGAINST INSECTS, MITES AND FUNGI 100%  
NATURAL**

## **ESSENTIAL BASIC SUBSTANCE**

### **PRODUCT DESCRIPTION:**

**PROTECTIVA-U** is a purified Ayurvedic concentrate 100% pure vegetable, with a powerful proven effect of protecting plants against insects, mites and fungi.

When using **PROTECTIVA-U** you can observe:

1. Drastically reduced residues:
  1. Completely natural product.
  2. Reduction of toxic residues in your crops.
  3. Respect for plant health and consumer health.
2. Guaranteed efficiency:
  1. Systemic effect.
  2. Elimination of problematic insects like spider.
  3. Efficacy against foliar and root fungi.
3. Powerful self-defense effect:
  1. Thickening of cell walls.
  2. Prevention of infestations.
  3. Healthy and balanced plants.

### **WHEN IS IT APPROPRIATE TO APPLY PROTECTIVA-U?**

1. As protection against mite infestations naturally and effectively.
2. As a natural protection against aphid, white fly, cochineal, etc.
3. As protection of diseases caused by fungi: fusarium, mildew, etc.

### **APPLICATIONS:**

**PROTECTIVA-U** is applied when the appearance of insects and/or fungi is observed in the crop or weekly throughout the growing cycle of plants as a prevention treatment. In general, it is recommended to perform the applications by foliar sprays, however, the soil applications can be performed without any inconvenience according to the needs of the growing system and the specific needs of the plants.

1- Spray foliar:

1. Preventive treatment: 0.5mL/Liter of spray water. Every 7 days from the second week of cultivation until the end of the cycle.
2. Healing treatment: 1mL/Liter of spray water. Once the first symptoms have been detected, 3 applications at 7 days interval.

2- By irrigation:

1. Preventive treatment: 0.5mL/Liter of irrigation water. Every 7 days from the second week of cultivation until the end of the cycle.
2. Healing treatment: 1mL/Liter of irrigation water. Once the first symptoms have been detected, 3 applications at 7 days interval.

3- Hydroponics:

1. Preventive treatment: 0.5mL/Liter of circulating water. Every 7 days from the second week of cultivation until the end of the cycle.
2. Healing treatment: 1mL/Liter of circulating water. Once the first symptoms have been detected, 3 applications at 7 days interval.

All YUKHA products, except those from the PROTECTIVA range, can be used in combination with each other without any inconvenience up to a maximum of 3 products in the same broth.

Note that maintaining a neutral but slightly acid pH is essential for the application of these products, so it is necessary to maintain the broth pH between 6 and 6.5.

Keep products in their original packaging, well closed and protected from direct sunlight. These storage conditions will allow YUKHA products to have a shelf life of 24 months from the date of opening the container.

The YUKHA team advises to not exceed the recommended dosages of application to avoid plant physiological imbalances.

## MORE INFORMATION ABOUT PROTECTIVA-U

### FORMULA DESCRIPTION:

**PROTECTIVA-U** is a purified Ayurvedic concentrate obtained by maceration and decoction of the combination of the aerial part of 2 herbaceous species and the roots of 3 different shrub species.

**PROTECTIVA-U** active ingredients are very effective in combating pests and diseases of plants, does not generate resistance and is non-toxic, since it is a completely natural product, so it leaves no residue on the crop and also does not harm the health of end consumers.

You can be completely sure that **PROTECTIVA-U** is completely free of animal and chemical ingredients.

### FORMULATION FEATURES:

**PROTECTIVA-U** is effective in treatments against major pests and diseases:

1. Insect protection effect: Aphids, black and white fly, cochineal, etc.
2. Mite protection effect: Mites and red spider.
3. Fungal protection effect: Fusarium, Mildew, Alternaria, Monilla, Botrytis, etc.

**PROTECTIVA-U** has a powerful effect on pests and diseases, but it is mild and does not damage plant tissues in plants as long as the application doses are respected and not applied under extreme temperature or light conditions.

**PROTECTIVA-U** also has a phyto-fortifying effect, it stimulates natural self-defenses of plants, helping to avoid possible infestations.

**“Improving the balance and physiological state of plants thru applying natural vegetal active ingredients means increasing the quantity and quality of final production without compromising on your own health...”**
