Assembly

Seam Allowance is $\frac{1}{4}$ "

- Layout your cut pieces according to the diagram at the right.
- You can download a separate [template here](#)
- Piece each column together according to the diagram with a $\frac{1}{4}$ " seam

[LAYOUT FILE](#)

Final Assembly

Seam Allowance is $\frac{1}{4}$ "

- Sandwich the backing 18" square wrong side up with the 18" batting scrap on top.
- Layout your column pieces on the batting sandwich according to the diagram at the right.
 - Mark the center of your batting sandwich with a water-soluble pen
 - Then draw another line $\frac{3}{4}$ " away from that line on either side. This will keep your first row straight
- You can use the same template
- If using the #37D for piecing, you can use this to attach the columns to the batting and backing otherwise...
- Attach your walking foot and determine the $\frac{1}{4}$ " marking on the foot.
- Sew the strips to each side of the center until all of your columns have been sewn

Add the Borders

- Using either the dual feed or walking foot, attach your borders
- Draw your placement lines on the top and bottom of the pieced quilt
- Attach sides first
- Attach top and bottom

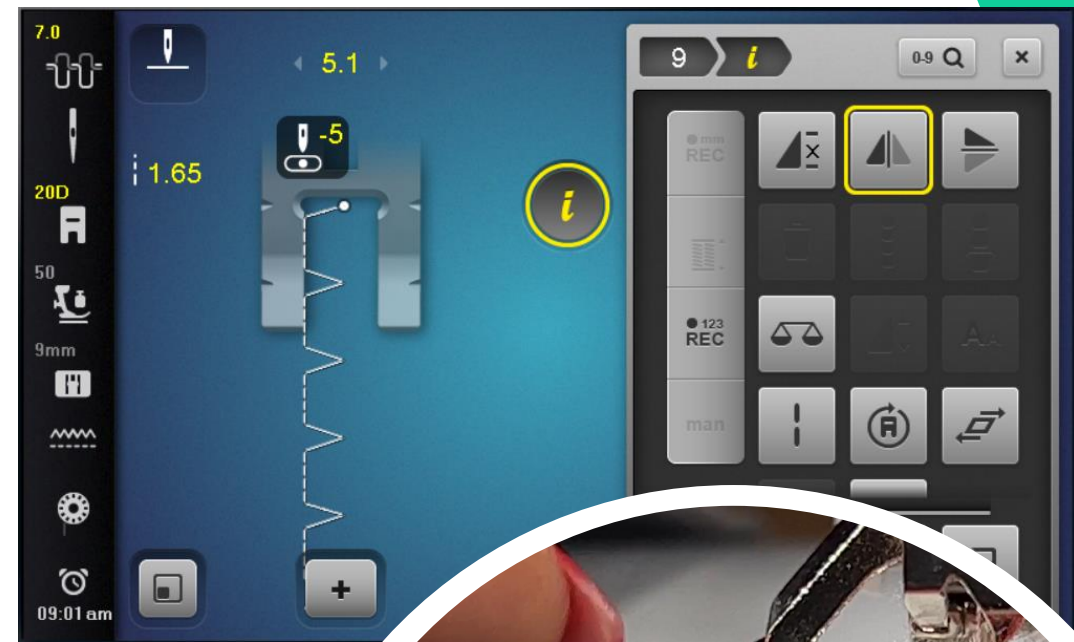

Scalloped Binding

- Set your machine for a #9 blind hem stitch (**Adjustments may vary, DO A TEST!**)
 - Stitch Width to 5mm
 - Stitch length to 1.65mm
 - Mirror the stitch
 - Needle position 2 notches to the right (-3)
 - Adjust upper tension to 7
- Lace the prepped binding under the foot with the fold lined up under the foot so that...
- The needle barely goes lands off of the fold when it swings to the right.

Cut Binding:

Cut remainder of the silver grid fabric into 2 ½" strips on the bias. Stitch together at miters and press ling strip in half to form binding piece

Attach Binding

Attach the binding according to the instructions in the YouTube Tutorial
