

Release Date: October 2023

Software Version: v1.90.08

Firmware Version: v22.04.09

Recommended Use

This release is recommended for all affected products listed below. It is important to keep your diagnostic tool current for optimum performance and to take advantage of all added enhancements. Please reference your user's manual on how to perform a software / firmware update on your diagnostic scan tool or code reader.

Affected Product(s)

- INNOVA® 7111 Smart Diagnostic System

New / Added Features & Functions

- New partnership with FCA (Fiat Chrysler Automobiles) and AutoAuth to grant access to SGW (Security Gateway) on 2018 and newer FCA vehicles. User's will now have the ability to:
 - Erase OEM DTCs
 - Perform OEM special functions and active tests.
 - Perform Workshop Tools (such as resets, relearns, routines, and calibrations)
- Added the '*Workshop Tool Description*' function under the Workshop Tools landing page. It offers a comprehensive explanation on the purpose and usage for each function listed within the Workshop Tools page.
- Added GUID/Serial Number information under Version Information section in the Settings page.
- Added a mandatory requirement to *Sign In* or *Create an Account* to access the following important features:
 - TSB(s) and Recalls
 - Scheduled Maintenance
 - Predicted Failures
 - Fix for DTC
 - OEM Diagnostics
 - Workshop Tools
 - FCA SGW

Fixes / Updates

- Other minor bug fixes and tool enhancements.
