POLAR

86 mm

The POLAR loft ladder has got double sealing and hatch thickness 86mm, thanks to it is perfect for all conditions. POLAR loft ladder has the best heat transfer coefficient on the market $U=0,36$ and the highest 4 class airtightness. Because of the excellent parameters our POLAR loft ladder is suitable for montage especially where are the large temperature differences. Choosing our POLAR loft ladder is investment, which highly reduce the loss of the heating air, it as well helps to keep preferred level of thermal insulation and significantly reduce the costs of heating. Moreover this model is equipped with non-slip feet, which perfectly adhere to the ground and prevent scratches on the floor surface. Our non-slip feet included in POLAR loft ladder provide an aesthetic finish for the ladder after cutting. To increase security and for comfortable use our POLAR loft ladder is also equipped with stable and durable handrail. In the interest of user convenience, the handrail has been designed in such a way that it can be mounted on the left or right side depending on customer preferences. The excellent quality of materials used for the production of stairs and attention to every details of finish cause that the stairs will satisfy even the most demanding customers. The maximum load during use is up to 160 kg. By choosing the best insulated attic stairs on the market you reduce the costs associated with heating and thanks to it, you really contribute to the fight for a better climate.
