

## SuperFlux 5700K LEDsport Chips

- » Second generation LED chip technology delivering up to 20% more lumens over standard 5000K.
- » Maximum uniform color over viewing angle.
- » Silicon carbide synthetic diamond material for unmatched LED life.
- » Designed for sports lighting systems to achieve maximum delivered foot-candles-per-dollar.

## SuperSport Silicone Optics

- » Medical grade silicone delivers 90% optical efficiency and maximum ultraviolet protection.
- » Increases delivered foot candles up to 50% without added energy consumption.
- » Secures LED engine from dust, debris and liquids. Designed and tested to IP67 standards.
- » Zero glass or breakable parts. Proven installs across the USA in the toughest environments and conditions.
