To assemble your Bunny Bouquet you will need a hot glue gun. We recommend watching the video tutorial to see the assembling process visually as it can seem complicated when written down!

Start by weaving in all your yarn tails using the weaving needle included. Then its time to assemble the main stems, wrap your red rose petals around the end gluing as you go to ensure its secure. Then slide the rose leaves up the stem and secure with a small dab of hot glue.

Twist your larger leaf around the stem and use the wire to arrange the height and angle. When you're happy its time to wrap the whole stem in green yarn. Secure the yarn at the top of the stem with a dab of glue and spin your stem around and around allowing the yarn to wrap. Go slowly as you cover the wire from the leaf.

Before adding your bunny to its stem, make sure you've stitched the bunny nose with brown yarn, and glued the eyes and ears on. Attach the head on top and bring the neck ruff up. Use your medium-width wire to attach your flower petals, hot glue the middles on top. Wrap two flowers around the stem with the bunny head, and wrap your red yarn around the stem using the same method as above.

And you're DONE! Congratulations on making your Bunny Bouquet. We hope you've enjoyed making your crochet creation.
