Synca AI Technology

The AI learns while you use the chair and automatically adjusts the massage to the best massage for you.

Up to 16,800 possible body types can be optimized by the AI.

Total Body Customization

Independently adjust compression strength for 8 different body parts, with 7 different strength levels.

The history of massage chairs is the history of Fujiiryoki.

Fujiiryoki, a Japanese company established in 1954, is the oldest manufacturer of massage chairs globally, and is renowned for its exceptional product quality and massage techniques. As the top-selling brand in Japan, their reputation is recognized worldwide. Fujiiryoki and Synca are the same company, so when you're buying a Synca JP3000 you're buying a Fujiiryoki JP3000.
