

Made in Japan by
the Company that
Invented Massage
Chairs in 1954

Experience true Japanese craftsmanship in the JP1100 by Synca Wellness. The JP1100 is assembled in Japan by master craftsmen that have been making massage chairs since 1954.

Their attention to detail and component quality is unrivaled and features key components made by Hitachi and upholstery and stitching crafted by the supplier to Nissan.

The JP1100s vivid touchscreen display, motorized legrest extension, and variable strength foot roller ensure you get all the key technologies you desire in addition to the best back massage money can buy.

MASSAGE CHAIR

 **GOOD DESIGN
AWARD 2017**

SYNCA

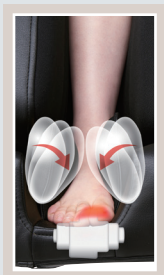

The Only Made-in-Japan Massage Chair with a Foot Roller

The variable strength shiatsu foot roller is designed to work the arch and plantar fascia muscles to reduce tension and foot pain. Coupled with the foot heater it also helps stimulate blood flow and circulation.

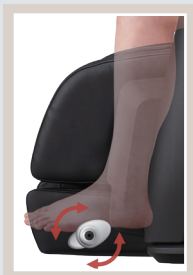

Focus on Sole Massage

3 Strength Adjustments

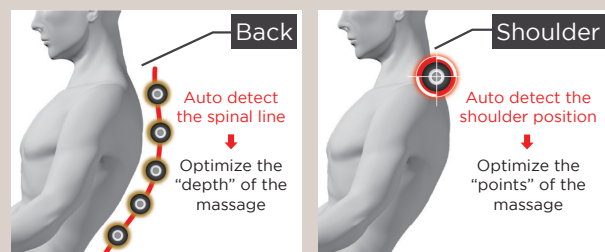

Roller Shape

Worlds Most Advanced Dual-Layer Body Scan

A unique dual layer body scanner measures both the length and depth of your spine ensuring you get the best massage possible.
