This high-performance seeding mix and lawn food allows your dog to do their business while keeping your lawn growing strong.

3 STEPS TO FLUFFY GRASS

PREP Prepare the area you want to grow grass by removing dead grass and loosening hard soil to help tiny seedlings root.

APPLY Evenly apply Bad Spot!™ so the area is mostly covered, but bare ground is still visible so the seed contacts the soil. (Use half as much for thin areas). Only apply the recommended amount so that the seedlings have enough space to access water and nutrients. The seed germinates best when daytime temperatures are between 60° and 80° F.

WATER A deep and thorough initial watering is the key to success. Gently water the area until Bad Spot!™ is completely saturated and no more water is being absorbed (this may take several minutes). Avoid pooling water. When Bad Spot!™ begins to turn light brown, it's time to water again. Keep kids, pets, and lawn mowers off newly planted seedlings until the grass is 3 inches high, so seedlings have the best chance to thrive.

NOTICE: ARBITRATION/CONCILIATION/MEDIATION REQUIRED BY SEVERAL STATES. Under the seed laws of several states, arbitration, mediation or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed to which this notice is attached to produce as represented. The consumer shall file a complaint along with the required filing fee (where applicable) with the Commissioner/Director/Secretary of Agriculture, Seed Commissioner, or Chief Agricultural Officer within such a time as to permit inspection of the crops, plants or trees by the designated agency and the seedsman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

CAUTION: TREATED SEED. This seed has been treated with mefenoxam. Do not use for food, feed or oil purposes. Store away from feeds and foodstuffs. Keep out of reach of children.
