8.2 Exposure controls

- Personal protective equipment:

  - General protective and hygienic measures: Immediately remove all soiled and contaminated clothing
    Wash hands before breaks and at the end of work.
    Avoid contact with the eyes.

- Respiratory protection: Not required.

- Protection of hands:

  - Protective Gloves
    Valid in case of prolonged contacts like during production
    Not required in normal use
    The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
    Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

- Material of gloves

  - The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
    Nitril rubber, NBR
    Natural rubber, NR
    PVC gloves

- Penetration time of glove material

  - The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

- Eye protection:

  - Safety glasses
    Valid in case of prolonged contacts like during production
    Not required in normal use
