

DR. REVA'S SavoRease™

Malnutrition occurs in over 50% of the older adult population. Patients and residents experiencing **dementia, dysphagia, poor dentition, and depression** are at an increased risk.

Registered Dietitian Nutritionists (RDNs) Certified Dietary Managers (CDMs), and other Food Service Professionals (FSPs) continually search for new ways to address the malnutrition challenge.

Many products exist on the market that can provide the nutritional needs of this population, but few can **bring back the joy of eating**, until **SavoRease**, a first to market, nutritious line of finger food products that are safe for those with chewing and swallowing challenges.

SavoRease Therapeutic Foods include dissolvable crisps, spreadable dips, and instant soups:

- Create a **safe yet full sensory experience** for your patients and residents with eye appealing, crunchy yet rapidly melting finger foods.
- Support eating independence with **finger foods**-helping you meet **ADL Quality Measures**.
- Counter **taste fatigue**-a savory alternative to sweet supplements and snacks.
- Provide **menu versatility**-serve them as a meal component, solid snack, supplement, or during activities.
- Support **snack protocols and smaller meals**-combine dips and crisps for a nutrient-dense option.
- **Labor-saving and convenient**-single serving packaging with easy-open design.
- **Shelf Stable**-conserving critical cooler and freezer space, and perfect for floor stock.
- **All natural**, plant-based, and free from common food allergens-great for lactose-intolerant.
- Improve **quality of life** and patient/resident satisfaction.
- Return positive food memories with **popcorn or cheese flavored crisps** for movie night.
- Combat **eating fatigue** with **nutrient-dense** easy to eat crisps.
- Award winning **Evidence-based research** demonstrates improvement in nutrition, quality of life, and safety.
- **IDDSI rated and labelled**
- **Proven to help advance texture with daily SavoRease snacks in rehab settings.**
