ATOMX

Give your members the opportunity to improve their performance and reach their goals with the industry's most advanced smart bike. Transform your indoor cycling classes into the most immersive and engaging indoor cycling experience with the Wattbike AtomX.

Versatile and easy-to-use, the AtomX is the perfect solution for your facility to increase your indoor cycling class occupancy and to help members reach their goals fast. The different training modes allow riders to train with 22 digital gears, or set target watts in ergo mode and the AtomX will automatically adjust the resistance to meet the desired output. Climb mode empowers members to try bucket-list climbs from around the world, including Alpe d'Huez, Monte Grappa and many more.

The Wattbike AtomX features our brand new electromagnetic resistance for a smoother ride, our renowned Real Ride Feel, and our unique digital shifters to control the workout. Perfect for indoor cycling classes, the gym floor and for accurate performance and fitness testing.

KEY FEATURES

TRAINING MODES

Empower your members to choose from inbuilt workouts or specify their desired watts in ergo mode, and the AtomX will adjust the resistance to meet their desired output. The climb simulator mimics the gradients of world famous routes, making them as challenging as they would be in real life.

PERFORMANCE TOUCHSCREEN

Our high-definition touchscreen elevates the cycling experience by delivering the most advanced performance feedback. Showing cadence, watts, speed, distance, heart rate, Polar View and Pedalling Effectiveness Score, riders can track and improve their performance with every single pedal stroke.

INTEGRATED SHIFTERS

Put control of the workout at your members' fingertips. Change gears, adjust resistance, toggle workout modes, scroll through data screens, and even start a new lap without ever leaving the handlebars. Haptic vibrations enhance the Real Ride Feel.

CONNECTIVITY

The AtomX's unrivalled connectivity and ergo mode allows riders to connect the bike to a host of third party apps through a smart device. Seamlessly connecting to apps such as Zwift, Strava, Training Peaks, or FulGaz; so members and clients can train their way.
