

Hollusion Projection Material

USER GUIDE

PRO TIPS

- 1/ Turn off any light sources which shine directly on your Hollusion for the clearest effect.
- 2/ Decorate the area behind your Hollusion with furniture, props, and lights, to really make your decoration pop.
- 3/ To clean your material, wash with warm water and soap followed by a cool rinse, then use a tumble dry setting on low. Do not iron the material.
- 4/ Project at an angle instead of directly at your window to better hide your projector.
