Window
Projection Material

1 Unpack and unfold the material

2 Measure and line up the material with the inside of your window

3 Apply double-sided sticky to the hooks and place behind the grommets

4 Hang the material from your hooks

5 Set up your projector and start decorating!
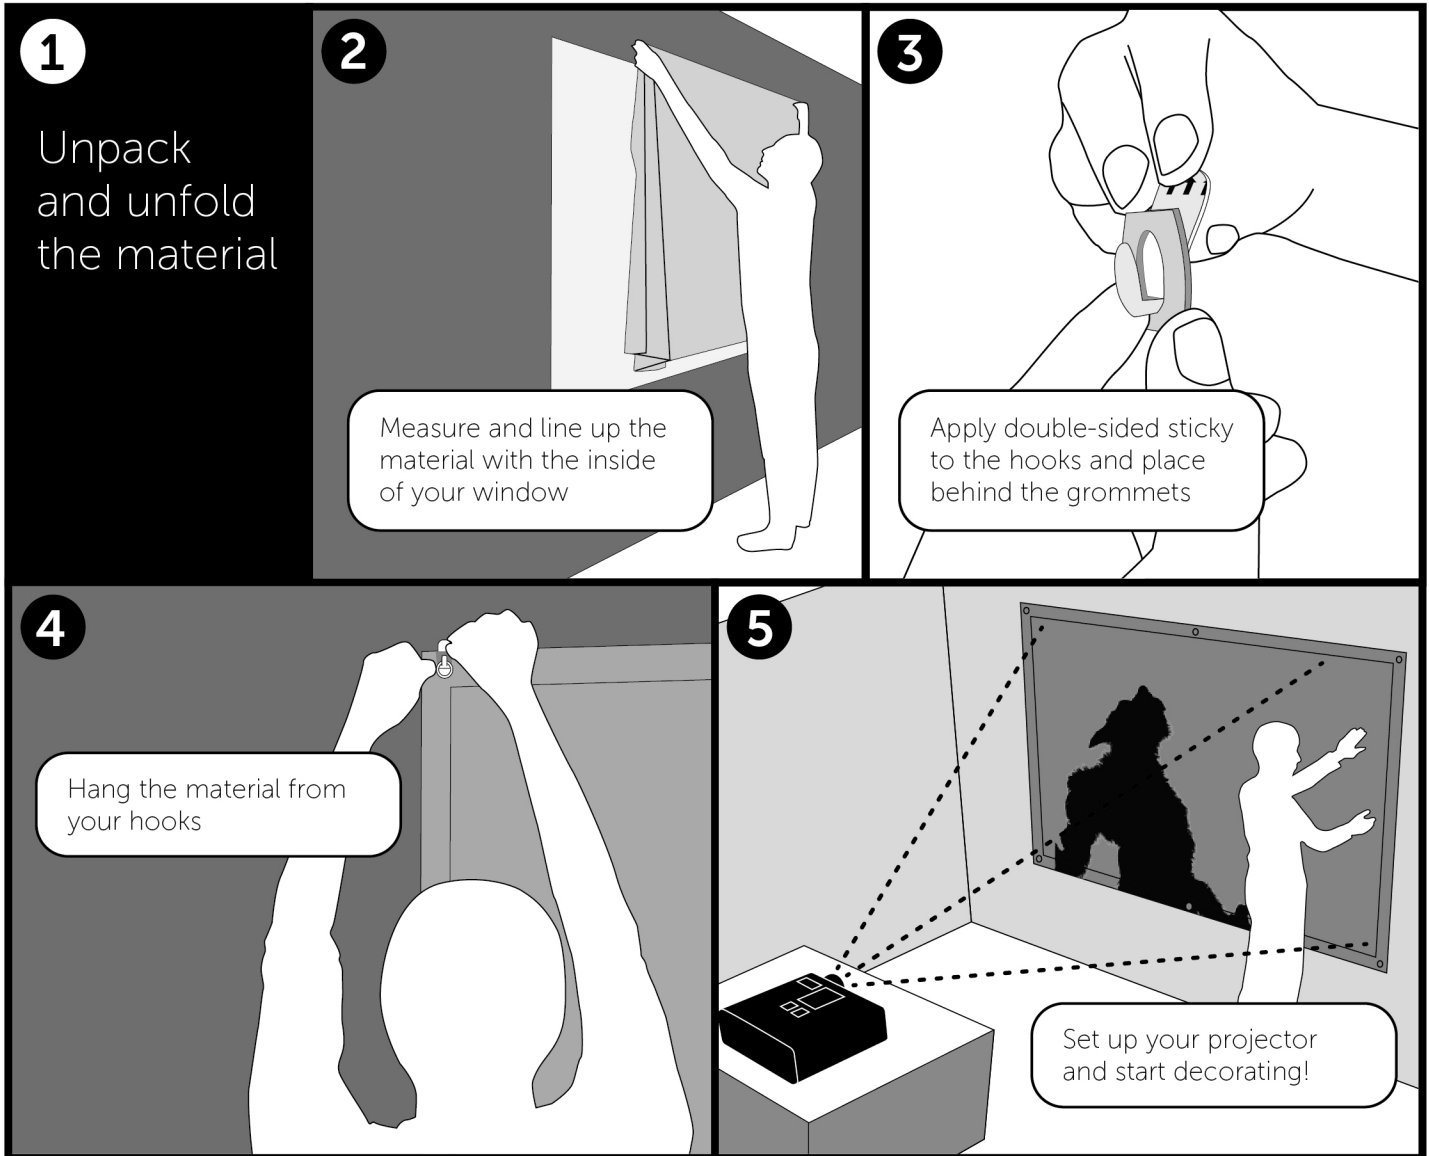

PRO TIPS

1/ To remove creases, use a clothes iron on its lowest heat setting.

2/ To clean, soak material in hot water with a dash of vinegar and then hang dry.

3/ Turn off any light sources near your window (both inside and outdoors) for the clearest effect.
