Window Projection Material

1. Unpack and unfold the material
2. Measure and line up the material with the inside of your window
3. Apply double-sided sticky to the hooks and place behind the grommets
4. Hang the material from your hooks
5. Set up your projector and start decorating!

PRO TIPS

1/ To remove creases, use a clothes iron on its lowest heat setting.
2/ To clean, soak material in hot water with a dash of vinegar and then hang dry.
3/ Turn off any light sources near your window (both inside and outdoors) for the clearest effect.
