At PlusFloor, we are passionate about finding more sustainable flooring solutions.

We endeavour to seek out the latest manufacturing techniques and developments without compromising on quality and performance. We support a circular economy and want to reduce our environmental impact wherever we can.

Our new BaseZero carpet tile backing is made from 100% recycled materials and contains zero toxins. It is completely recyclable as part of our LoopBack initiative.

# How BaseZero is applied to our carpet tiles and planks.

# Our NEW carpet collections with BaseZero

- 100% Solution Dyed Nylon
- 530 gr/m<sup>2</sup>

# Sustainable flooring solutions.

We support a circular economy and want to reduce our environmental impact wherever we can through our innovation and processes.

We understand that carpet tiles in commercial environments can often have short downtime with tastes and interior trends constantly evolving, but our carpet tiles have a commercial warranty of at least 10 years and we want them to reach their end-of-life before they are recycled.

We can collect and uplift on-site, used carpet tiles and provide you with a LoopBack certificate. We manually sort through and re-grade all carpet tiles, ensuring that 'second life is first choice'; all residual is then recycled.

A large percentage of our carpet tiles are forwarded on to social housing tenants and other low-income households to provide low-cost comfort and insulation. We guarantee that none of the carpet tiles we recycle are incinerated or sent to landfill.

**LoopBack**
