SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation

Remove patient from exposure. Keep patient at rest and give oxygen if breathing difficult. If symptoms develop, obtain medical attention.

Skin Contact

After contact with skin, wash immediately with plenty of soap and water. In the event of contact with molten product: Cool affected area quickly with water. Do not attempt to remove hardened product. Obtain medical attention.

Eye Contact

Flush eyes with water for at least 15 minutes while holding eyelids open.

Ingestion

Call a physician (or poison control centre immediately). Do not induce vomiting, wash out mouth with water.

4.2 Most important symptoms and effects, both acute and delayed

Unlikely to be required but if necessary treat symptomatically.

4.3 Indication of any immediate medical attention and special treatment needed

Unlikely to be required but if necessary treat symptomatically.

SECTION 5: FIRE-FIGHTING MEASURES

- 5.1 Extinguishing media**
Suitable Extinguishing Media In case of fire, use water spray, foam, dry powder or CO2 for extinction.
Unsuitable Extinguishing Media None.
- 5.2 Special hazards arising from the substance or mixture** In case of fire the following can develop: Oxides of carbon.
- 5.3 Advice for fire-fighters**
A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions.
Dust is ignitable but will not sustain combustion. A high temperature source of ignition is required. Insensitive to sparks. The minimum spark energy required for ignition of a dust cloud is greater than 5000 mJ. It will not train fire, e.g. along beams etc.
- 5.4 Other** Dispose of contaminated extinction water according to official regulations.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures** Avoid inhalation and contact with eyes or skin. Ensure sufficient supply of air. Avoid build up of dust. Remove possible cause of ignition – do not smoke. Take precautionary measures against static discharge.
- 6.2 Environmental precautions** Avoid release to the environment. Prevent surface and ground water infiltration, as well as ground penetration.
- 6.3 Methods and material for containment and cleaning up** Sweep up carefully with non-sparking tools. Transfer to a lidded container for disposal or recovery.
- 6.4 Reference to other sections** None
- 6.5 Additional Information** None

SECTION 7: HANDLING AND STORAGE

- 7.1 Precautions for safe handling**
General hygiene measures for the handling of chemicals are applicable. Eating, drinking, smoking, as well as storage is prohibited in the work room. Avoid build up of dust. Local Exhaust Ventilation (LEV) at the work place or on the processing machines required. Note: Danger of explosive dust.
- Machine Cleaning (purging): Purging with other polymers (e.g. Polyethylene) at high temperatures can be hazardous. Auto ignition may also occur. LEV is required. The relevant Safety Data Sheet for the purge material to be used should be consulted. Additional information can be obtained from the Invibio Processing Guide.

- 7.2 Conditions for safe storage, including any incompatibilities**
 Storage Temperature Store products enclosed, in original packing.
 Storage Life Store at room temperature.
 Incompatible materials > 10 Year(s).
 None known
