Orgone Effects[®] Geoclense[®] Testing

This testing was done using a special attachment to the Kirlian Camera which allowed us to test the energetic qualities of water.

The image on the left was water heated in a microwave oven without an Orgone Effects[®] Geoclense[®], which shows the water image distorted.

The right image is microwaved water with an Orgone Effects[®] Geoclense[®]. Water is like a person, it reacts to good and bad energy.
