

CARBU CLEAN

**Very powerful cleaning agent for carburettor
Spray**

TYPE OF USE

Carburettor cleaner especially developed to eliminate deposits and varnishes on throttle valves, throttle-chambers, nozzles, jets, tanks, floats, venturi tubes.

PERFORMANCE

Dissolves very quickly any deposit, varnish or gum.
MOTUL CARBU CLEAN stabilizes engine idling and improves engine acceleration.
Allows fuel consumption reduction while increasing engine performance.

RECOMMENDATIONS

Shake before use.
When the engine turned off, disassemble the air filter and spray MOTUL CARBU CLEAN in the air intake pipe, let stand for 10 minutes.
Start the engine and spraying product on nozzles, throttle and throttle chambers.

Once carburettor or injection body is disassembled:
Spray from a short distance on the areas to be cleaned.
Let stand and re-spray on very dirty areas.
Wipe with a dry soft fabric.

For 4 stroke engines, complete the operation with MOTUL FUEL SYSTEM CLEAN.

SECURITY

Refer to the MSDS sheet and the information mentioned on the spray.
