

CHAIN PASTE

Lubricant for road motorcycle chains

White color and very sticky

Paste in tube with brush tip applicator

TYPE OF USE

High performance grease formulated with Complex Aluminum soap, Extreme Pressure, anti-wear, anti-oxidation and anti-corrosion additives.

All types of chains: standard and with O-RING, X-RING, Z-RING.

Specially recommended for very fast motorcycles.
MOTUL CHAIN PASTE adheres to the chain even at high speeds.
Suitable for all type of road bikes and go-karts.

Continuous lubrication temperatures: from -20°C / -4°F to +120°C / +248°F, and up to +130°C / +266°F in peak.

PERFORMANCE

Reduces friction and therefore increases power.
Increases chain durability.
Water and salt resistant.
Permanently protects the chain against corrosion.
No action on seals.
Practical, cost effective, ecological, not cumbersome and non-inflammable.
Easy to store under the seat of the bike.
One 150ml tube allows about 10 effectuations.

RECOMMENDATIONS

The chain must be cleaned with MOTUL CHAIN CLEAN prior to the use of MOTUL CHAIN PASTE.
Apply the paste and spread it on the whole length of the chain using the brush tip applicator.
A small quantity of paste is enough to lubricate all the chain. Do not apply a thick layer of paste.
Spread the paste on the whole chain and especially the inner parts until there is a thin and homogenous layer.
MOTUL CHAIN PASTE adheres completely after a few minutes.

PROPERTIES

Color	Visual	White
Consistency grade	ASTM 217 mod	NLGI 1
Soap	Type	Aluminum Complex
Density	IP 530	0.920

SECURITY

Refer to the MSDS sheet and the information mentioned on the tube.
