 Phonics Words: beam, seal, leaf, she, we, flea, thief

Guided Reading

Study Plan
 Saying tricky words slowly and carefully can help you remember how to write them. For example say thief with special attention on the th and the f.

When the bus arrived at the conservation area, Come-along was already there. The assignment was to photograph amphibians and reptiles for nature study. Antonio located some tadpoles at the edge of a pond. Using her zoom lens, Sophia snapped a picture of a single tadpole. (She was the official photographer.) Then Sophia managed to net a beautiful green frog. Quincy brought over the brown toad he had found in the sand pit. Sophia photographed them side by side. Later, they would compare the two creatures. Liam found a spotted salamander by the stream. They looked for reptiles as well. Come-along pointed out a long garter snake curled up under the wooden bridge. Lei found a Northern Map turtle. She amazed the others with her knowledge. Lei explained that it was called a map turtle because of the shapes on the shell. And she told them that every turtle's shell is made up of 60 different bones. The outer plates of the shell are like connected fingernails. Mr. Burger said maybe Lei should be the nature study instructor. Lei smiled and said she'd think about it.

Comprehension

- Underline the correct answer.
 - The photographer is: Liam Sophia Lei
 - Lei was studying: science math art
- Circle the name of the character who netted a frog. Underline the character who brought over a brown toad.
- List the facts Lei shared about turtles.
