

The minimum printing is 1000 units. This lot is not divisible, which means it must be 1000 times the same illustration. Our tattoos are printed in the USA, with hypoallergenic and non-toxic inks. **The regular printing time is approximately 4 weeks after the approvals are signed**.

Each custom temporary tattoo is individually cut to the desired size. A transparent protective film covers each of the tattoos. Personalized temporary tattoos are grouped in quantities of 200 and packed in bulk using an elastic band. Your tattoo order will be delivered in a protective zyploc type packaging. We recommend that you store the tattoos in their bag in a dark and dry place for better conservation over time.

NOTE:

Payment must be comple before we start printing. It is also possible to have personalized illustrations produced by our illustrators. It costs an additional \$ 300 to produce such an illustration.
