# TRAMEDIKIT<sup>®</sup> TRAUMA KIT

STANDARD STOCK

PART# 60-0021

US PATENT 10,085,900

## STANDARD STOCK CONTENTS

- 1x SOF<sup>®</sup> Tactical Tourniquet Wide – Rescue Orange
- 1x Tramedic<sup>®</sup> Trauma Bandage
- 1x Petrolatum Gauze (3x18")
- 1x 2" Surgical Tape
- 1x Mask w/ Eye Shield
- 1PR Nitrile Gloves, size XL (purple)
- 1x Heat Reflective Emergency Rescue Blanket (84x52")

The Tramedikit<sup>®</sup> contains the necessary items to treat serious injuries such as heavy bleeding or penetrating chest trauma. Compact enough to fit in a desk drawer, glove box, or backpack, the Tramedikit<sup>®</sup> is packed in a resealable bag, allowing for easy inspection and replacement of individual components.

The included instructions prioritize which components to use first, and components are clearly marked to correspond to their instructions. The instructions act as a guide through the treatment process and help reduce the guess work.

With the Tramedikit<sup>®</sup>, you will receive 1 license to our training portal, where videos detail the components of each sub kit. Designed to be viewed by users of all ages, these videos are not only informative and educational, but they could save a life. Access to the training site allows facility training managers to assign videos to personnel and staff as well as track their progress.

The Chest Seal Version of the Tramedikit<sup>®</sup> replaces the Petrolatum Gauze and Surgical Tape with the vented Beacon Chest Seal.

It's more than first aid. It's the **Tramedic<sup>®</sup> Difference.**
