RESCUE TASK FORCE LITTER

PROVIDES AN EFFECTIVE CASUALTY EVACUATION PLATFORM THAT IS QUICK AND EASY TO EMPLOY.

PRODUCT SPECIFICATIONS

PRODUCT #	● - RTFL-B BLACK	● - RTFL-T TAN	LITTER ONLY - RTFL
DIMENSIONS	In Carrier - 8"W x 22"L x 5.5"D 20.3cm W x 55.9cm L x 14cm D		
WEIGHT	98oz / 2778g		

INTENDED USE

Rugged, semi-rigid casualty evacuation platform that is quick to deploy, easy to secure a casualty, and durable to withstand use over rough terrain.

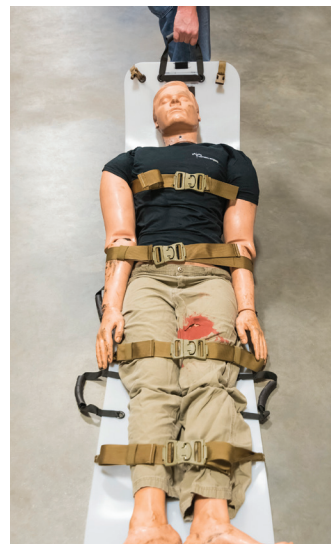

RESCUE TASK FORCE LITTER

The **Rescue Task Force Litter** is small enough to attach to your kit or another bag but is still functional in a rescue environment. It provides a rapid means of casualty movement without compromising durability, flexibility, or the individual's ability to maneuver through the most demanding environments. Casualties can be dragged or carried off target without excess time spent rigging and securing. It also eliminates the wait time for a conventional litter to be brought from the breach point or a support vehicle.

PRODUCT FEATURES

- 1 Rapid deployment drag line already rigged to litter.
- 2 Improved plastic bed for longer product life when evacuating over rough terrain.
- 3 Quick secure straps, with larger buckles, making it easier to use when wearing rescue gloves.
- 4 Compact storage.
- 5 Multiple quick grab handles.

ADDITIONAL FEATURES

Size allows movement of casualties through narrow passages and walkways such as on aircraft, buses, and trains.

Casualties can also be sat up to make tight turns on stairwells and hallways.
