

- THE PREFERRED TOURNIQUET OF **ELITE MILITARY FORCES AND FIRST RESPONDERS** WORLD-WIDE
- THE TOURNIQUET OF CHOICE BY 7/10 OF THE USA'S LARGEST POLICE **DEPARTMENTS**
- EXCLUSIVE TOURNIQUET OF THE **AMERICAN RED CROSS®**
- EASY ONE-HANDED APPLICATIONS
- DEVELOPED AND ENGINEERED BY **SPECIAL OPERATIONS MEDICS**
- **U.S. PATENTED DESIGN** AND PROPRIETARY TECHNOLOGY
- MEETS NEW ANSI STANDARDS 100%

PRODUCT SPECIFICATIONS

WEIGHT

3.7 oz / 105 g NSN

TACMEDSOLUTIONS.COM

The **SOF® Tourniquet** sets the benchmark for prehospital tourniquets. Its innovative design was engineered through extensive end-user feedback, incorporating the features most important to professionals working in the field, making it stronger, faster, and smoother than ever before.

NOTEWORTHY UPDATES

- Easy-pull action for smooth, quick self-application.
- Custom engineered materials for increased strength and durability.
- Lighter weight for improved portability.

MATERIALS LIST

- Aircraft Grade Aluminum
- NeopreneNylon
- Polyester
- Steel

PRODUCT FEATURES

PERFORMANCE COMPRESSION BAND
Reinforced polyester webbing that
maximizes compression and speed of
application. At a true 1.5" width, the
material smoothly glides through the
Rugged Buckle for easy and effective
one-handed and two-handed
applications.

RUGGED BUCKLE

Engineered to remove excess slack in a single fluid motion, the buckle's shape stabilizes the Performance Compression Band at any angle of engagement. The Rugged Buckle is an advanced, lightweight composite design with superior strength over previous versions.

SLACK INDICATOR WEDGE

Stitched into the Performance
Compression Band below the windlass,
the contrasting wedge offers a visual
confirmation you have pulled all excess
slack from the band. This is a critical
step for proper tourniquet application
and results in fewer required windlass
rotations to reach occlusion.

4 HIGH-STRENGTH ALUMINUM WINDLASS

Machined from a single aircraft-grade aluminum bar stock, the 5.5" windlass features signature conical ends and grip-friendly texture for consistent torque. Its anodized finish minimizes impacts from environmental elements for durability in any scenario.

REINFORCED TOURNIQUET RETENTION ASSISTANCE CLIP (TRAC)

Conveniently holds the windlass in place until you can secure it into the Tri-Ring Lock – even under extreme lateral loads. The TRAC provides steady handling during tough applications and enhances control for one-handed maneuvers.

6 TRI-RING LOCK

Complete the tourniquet application by securing the windlass into the Tri-Ring Lock. It can easily be manipulated with just one hand and prevents the windlass from shifting during patient movement.

TIME TAG

A tag for documenting the tourniquet application time.
