

## Insulated Lid - Heat Trace Tote Tank / IBC Freeze Protection

**FreezePro® Frost Protection Systems** deliver a barrier of uniform, directional heat where it is needed most - to tanks, pipelines, drums, buckets, IBC totes, and other temperature sensitive equipment. The advanced, all-in-one design of FreezePro® eliminates the need for multiple product purchases and simplifies the entire implementation process while saving time and money. The end result is an efficient heating solution with the most cost-effective method for minimizing damage caused by harsh or freezing temperatures.

**FreezePro® Tote Tank Lids** are designed to be used in conjunction with the FreezePro® Tote Tank heat trace insulation blankets. Each side covers the entire top of the IBC Tote and has a 6" down flap around the edges, which also fits around the upper portion of the insulation jacket. FreezePro® Tote Tank Lids are designed to improve efficiency to help contain heat, conserve energy and shorten the time it takes to heat your material in the tote.

<b>ITEM</b>	Frost Protection Insulation Lid	<b>FASTENING SYSTEM</b>	Polypropylene Webbing, Plastic Side-Release Buckles
<b>LENGTH</b>	48in / 1219mm	<b>APPROX. "R" FACTOR</b>	.48
<b>WIDTH</b>	48in / 1219mm	<b>TEMPERATURE RANGE</b>	-40°F / -40°C to 200°F / 93°C
<b>WEIGHT</b>	16lbs. / 7.3kg	<b>COLOR</b>	Black
<b>THICKNESS</b>	0.5in / 12.7mm	<b>FIT</b>	Universal
<b>INSULATION MATERIAL</b>	EPDM Rubber Foam	<b>JACKET MATERIAL</b>	PVC Fabric
