

SPECIFICATION

1. Design Standard : ASME B 16.34
2. Process Connection : 2" CLASS 150 RF (ASME B 16.5)
3. Instrument Connection : 2" CLASS 150 RF (ASME B 16.5)
4. Vent Connection : 1/2" FNPT (ASME B 1.20.1)
5. TEMP. Rating : -20 ~ 150 °C
6. Pressure Test (API-598)
 - Design Pressure : 19.0 bar
 - Seat Test Pressure : 20.9 bar
 - Shell Test Pressure : 28.5 bar
7. Anti-static, Anti Blow-out Stem, Locking Device
8. Bore : 14mm
9. Unit : mm

Application & Installation

Solution

S-LOK instrumentation products has the ultimate solutions for a compact range one-piece forged body Primary Isolation Valves, featuring a choice of end connections, body styles and valve technology

Applications

- Double block and bleed instrument isolation
- Process piping isolation point
- Chemical injection systems
- Sampling systems
- Instrument Vents & drain
- Piping / instrument interface
- Direct mounting of instruments

Markets

- Offshore Oil & Gas
- Chemical Plant
- Petrochemical
- Power Generation
- LNG Carrier

Installation Advantages

- Compact design
- Provided weight & space savings.
- Reduced leakage points
- Reduced vibrational stresses.
- Supporting bracket are not required
- Reduced installation & maintenance costs

Design Standards

- ASME B 16.34 Valves-Flanged, Threaded, and Welding End
- ASME B 16.5 Pipe Flanges and Flanged Fittings
- ASME B 1.20.1 Pipe Threads, General Purpose
- API 607 / BS 6755 part 2 Fire test for Quarter-turn Valves
- ISO 15848-1 / 15848-2 Measurement, test and qualification procedures for fugitive emissions
- NACE MR 0175 / ISO 15156 General principles for selection of cracking-resistant materials

Specification

Standard Features

- ASME B 16.5 flanged connections 1/2" to 2" sizes.
- Class150 rated to Class2500 rated.
- API flanged connections sizes to 2-1/16".
- 1/2" ~ 1" NPT threaded female outlet / vent to ASME B1.20.1.
- Material thickness to ASME B16.34.
- Bolted Body construction (Inlet or Outlet) is options.
- Pressure test is in accordance with API 598
- Fire safe designed to API 607, BS6755 Part2.

Ball Valve Design

Features

- Blowout proof stem.
- Fully encapsulated allow high working pressure.
- Super finished ball for low operating torque and long life.
- End connector threads are fully isolated from process by primary and secondary static seals.
- Color coded and function identified handles.
- Bore size available 10mm (3/8"), ~ 50mm (2").
- Ball seats choice of materials : PTFE(virgin or filled), PEEK.
- Anti-static design as standard
- Pressure rating up to 10,000psig(690bar).
- Temperature rating -70.6°F to 482°F(-57°C TO 250°C).
- Optional : NACE Compliance, Handle Locking Device.

Materials of Construction

Description	Material Grade		
	Stainless Steel	Lower Temp. Carbon Steel	Duplex Stainless Steel
Body / Connector	A182 F316/316L	A350 LF2	A182 F51
Ball	A479-316/316L		UNS S31803
Stem	A479-316		UNS S31803
Seat	PTFE / R.PTFE / PEEK		
Thrust Washer	PEEK		
O-Ring	NBR / VITON (FKM)		
Packing / Seal	GRAPHIITE		
Bolt / Nut	A193 B8M Cl.2 / A194 8M	A320 L7M / A194 7	A453-660
All other part	Stainless steel 316		

NOTE

Stainless steel is standard body material but such a Monel, Super Duplex, Hastelloy, Inconel and other special material are available upon request

Needle Valve Design

- Stem threads are completely isolated from the process.
- Bolted bonnet for strength and reliability.
- Flange gasket seal ensures a bubble-tight between body & bonnet
- Adjustable gland flange allows easy access to the packing gland and packing adjustment for an effective stem seal.
- Investment cast yoke is precision casted for strength and perfect stem alignment.

Features

- Rolled stem threads prevent galling. Stem threads are completely isolated from the process.
- Stem packing with Graphite or PTFE rings for bubble-tight seal.
- Stem tip construction : non-rotating self-centering, Anti-galling tip positive bubble-tight and field interchangeable rip.
- Backseat design provides secondary stem sealing & prevents stem blowout.
- Packing bolt allows easy access to adjust the packing gland.
- Robust bar handle is standard.
- Color coded and function label for easy identification.
- Orifice size 0.2"(5mm).
- Pressure rating up to 10,000psig(690bar).
- Temperature rating -70.6°F to 1,022°F (-57°C to 550°C)
- Anti-Temper bonnets are available with a removable T-bar key to prevent unauthorized operation of vent valves.
- Standard valves are offered with Graphite. PTFE is also available as an option

Materials of Construction

Block & Bleed Valves

Sampling Double Block & Bleed Valve

- Sampling the process stream can be accomplished with this valve design, where a sampling can be taken even at full system pressure directly from the process line. The product allows double isolations from process for safety
- The Sampling Probe length is manufactured to suit customer requirements

Injection Double Block & Bleed Valve

- Injection of chemicals and other media into the process stream can be accomplished with this valve design. The valve inlet houses a one way check valve which opens for injection and goes normally closed to eliminate process fluid outflow.
- The Injection Quill length is manufactured to suit customer requirements. The Injection Nozzle is a 3.2mm diameter hole. (Standard)

- Integral Check Valve
- This poppet type spring return valve has a Viton soft seal (Standard)
