

FLOATING SHELVES *INSTALLATION GUIDE*

To make the installation process effortless and quick, you will need:

- Tape measure
- Stud finder
- Pencil
- Level
- Drill

Step 1: Stud installation is strongly recommended! Use a stud finder to locate studs, and lightly mark their location with a pencil.

Step 2: Once you determine where to hang your shelf, using a level, line up the mounting bracket on the wall. Use a pencil to mark the bracket's screw holes on the wall studs.

Step 3: Using provided screws, lightly screw the mounting bracket into the wall (do not screw completely). Using a level, check to make sure the mounting bracket is level, and fully screw the bracket into the wall.

Step 4: Line up the holes on the back of the shelf with the bracket extensions, and slide the shelf over them.
