# SUDGA SERIES 2024 RULES

- There are 10 Standard SUDGA Series Events and 1 Finale event. The first 10 events are standard. Each standard series event is worth the standard amount of points. The Finale is worth twice the standard amount of points.
- In order to qualify for the SUDGA Series Finale, you must play and complete in a minimum of 5 standard series events.
- All players who qualify for the finale will receive a series payout, whether they play in the finale or not.
- Your best 5 scores will be calculated for the series standings. Any events played after 5 will drop your lowest score(s).
- Points are not transferrable between divisions. For example, if you win in the MA1 division and then next event play and win in the MA2 division, you will receive 100 points for the MA1 division and 100 points for the MA2 division. You cannot move points from one division to another.
- With 10 events and only 5 needed to qualify, it is possible to play and win in two different divisions for the standard series events. Unfortunately, you will only be able to qualify for the Finale in one division. The higher division that you have qualified for will be the only division you can compete in the finale.
- If you do not finish an event, it can still be counted for points if you have completed a minimum of one round in the event. If you don't complete at least one round, you will not be distributed points nor will the event count as a series event for the player.
- For the finale, anyone is welcome to sign up for the event and play it like a standard event, but only those who qualified for the Finale will be playing for double the series points. The players who did not qualify for the finale but are still playing, will be ignored as far as the finale points are concerned.
- Players who qualified for the finale have registration priority over those who did not qualify for the finale and may be removed from registration in order of date of registration. Any players who might be removed will receive a 100% refund.
