The Oil Factor	Bomar presents Glycerine (Palm Free) 99.5%, Refined. You will find this in most cosmetic formulations for good reason, its versatility. Glycerin, also known as Glycerine and Glycerol is a substance present in all human and animal fats. Our material is derived via hydrolysis of fats during the Rapeseed Oil refining process (decomposition of a chemical compound by reaction with water). Glycerine helps keep your skin or hair moisturized via drawing water from the environment and delivering it to all layers of your skin, whilst at the same time providing a fantastic barrier/protector to your skin or hair. We do strongly suggest you formulate using this ingredient as the base but also adding in natural oils to add extra nutrients to the skin, it is best accompanied.
Functionality	Used in nearly every cosmetic formulation due to its versatility & low cost. Odourless. Palm Free (Rapeseed derived). A terrific carrier of moisture to the skin, whilst also acting as a barrier.
