The Oil Factor	An oil that has saved many a whale life! Bomar presents Jojoba, Wax. This wax is produced via a chemical free hydrogenation process using the unsaponifiable matter of Jojoba oil. You can use it alone or mix it with other oils. Jojoba itself was originally introduced into the market as a replacement to sperm whale oil. The incredible story of this oil is that the spectacular sperm whales were once harvested (killed) for its spermaceti wax content. The introduction of Jojoba established it carried similar, if not better properties, saving the lives of multiple whales. With an approximate melting point of 65 degC this product offers stability in your formulation. The wax is a reliable ingredient & is commonly used in lip care products, hair waxes, candles & face masks & even car wax to give your vehicle that extra shine!
Functionality	A stable emollient wax. Rich in vitamins A, E. A good stabilizer in oil-water solutions. Acts as a strong protector agent. A very good carrier wax to blend with other oils, mainly essential oils. Add in a little Tea Tree, Chamomile or whichever essential oil you fancy & this wax will carry it nicely.
