
Use in feed applications

Product	Caustic Soda Microprills
Valid until	31-12-2021

Nobian Caustic Soda Microprills can be used in the EU as a processing aid in the feed industry. The product meets all purity requirements (chemical parameters) of applicable feed additive monographs and regulations as mentioned on the product specification sheet. Please consult the product specification for the detailed product composition. This declaration does not relieve the end user from the obligation to perform quality control on this product and to perform feed related risk assessments.

Nobian manufacturing facilities producing Nobian Caustic Soda Microprills are not registered as EU feed facility after the European feed Laws (Regulation (EC) 1831/2003 a.o.). As a consequence, Nobian Caustic Soda Microprills is not produced as feed additive or ingredient.

The relevant Nobian Safety Datasheet (eSDS) lists all REACH registered uses permitted in the EU with their safe use conditions.

Note

To the best of its knowledge, Nobian declares this declaration to accurately describe the product's physical, chemical and/or manufacturing process attributes. Nobian does not make any warranty as to the suitability of its products for any application. The manufacture of this product (incl raw materials, production process and final product) and sales are controlled under the certified Nobian ISO 9001 quality system.
