

SODIUM BICARBONATE

Food Use

Sodium Bicarbonate has a long history as a food ingredient; its leavening action in baking products is known universally.

As an additive in food sodium bicarbonate is designated E 500ii. Under US regulations it is listed as GRAS (generally recognised as safe) and is registered with the Food and Drug Administration (FDA) with US FDA registration number: 18945175436.

Tata Chemicals Europe Ltd is registered as a 'Food Premises' under the Food Safety Act 1990. We manufacture high purity sodium bicarbonate that meets the requirements of the Food Chemicals Codex, and EU Regulation 1333/2008 as amended by EU Regulations 1130/2011 and 231/2012. The manufacturing process is operated using a food-orientated approach incorporating a HACCP (Hazard & Critical Control Points Analysis) system and GMP (Good Manufacturing Practice).

Tata Chemicals Europe is certified compliant with the BRC Global Standard for Food covering manufacture, packaging and distribution of sodium bicarbonate.

The product packaging complies with Regulation EC 1935/2004.

Tata Chemicals Europe is ISO 9001:2008 registered.

This statement applies to Sodium Bicarbonate produced by TCE in Winnington, UK.
