40" Vertical Rails

Upper Wheel
and handle
Assembly

Step 2:
Slide the 40" vertical
rail down the back side
of the box with the
exposed T-Nuts going
in the grooves of the
slots.

Axle Housing
Assembly

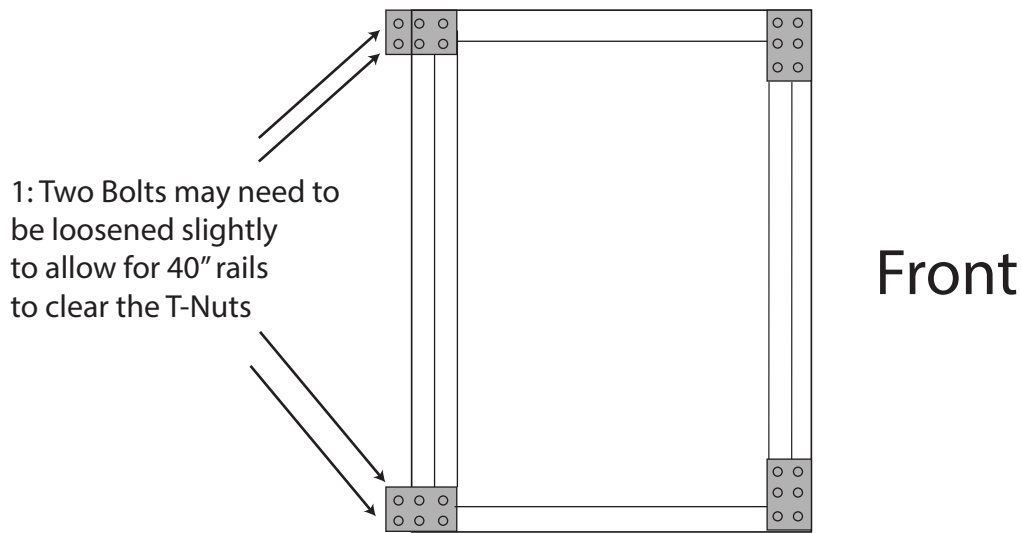

Step 1:
Stack top equipment
box on lower equip-
ment box with the
fronts flush with each
other.

Upper Equipment Box

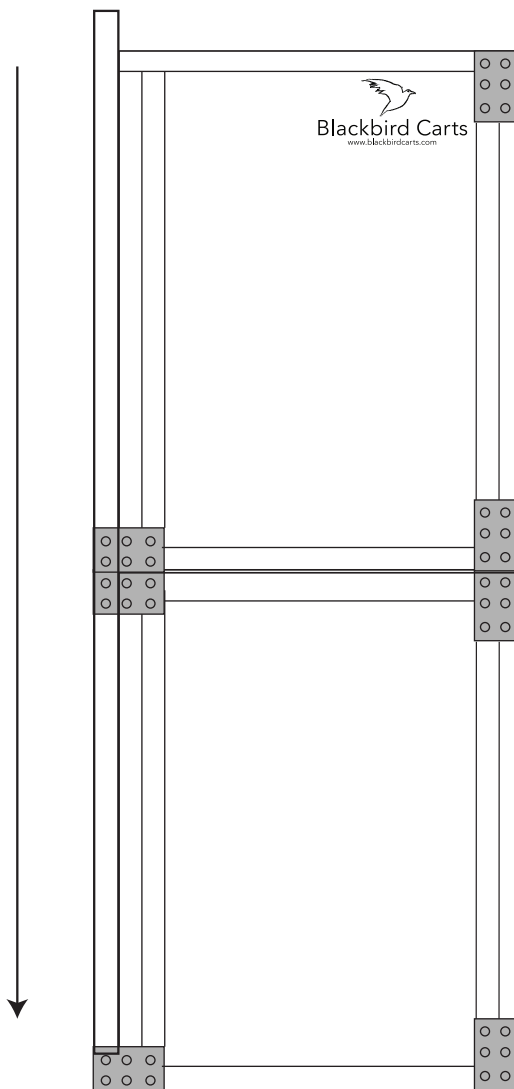

Lower Equipment Box

3. Turn assembly upside down and place on a piece of cardboard to protect the rails.

Slide axle housing down onto rear rails. If your cart has 4" black front casters then the lower triangle gussets will be about flush with the bottom of the cart. If you have 6" casters then use the included 4-hole straight plate and span the rear axle, 40" vertical bar, and back section of the equipment box. Carts with 6" casters will not have the lower triangle gussets pre-installed.
