

Meaco DELUXE 202 HUMIDIFIER

HIGH END ULTRASONIC HUMIDIFIER & AIR PURIFIER

MEACO DELUXE 202 HUMIDIFIER & AIR PURIFIER

The combination of cold weather and central heating in the winter makes for dry conditions in our homes that can cause dry skin, sore throats and itchy eyes. Dry air can also increase the risk of exposure to infections and have a negative effect for those with respiratory conditions and allergies. It is not just humans who are affected, so are our homes and furniture. A crack in your wooden furniture is usually shrinkage caused by a reaction to a lack of moisture in the air. At Meaco we have been dealing with regulating the level of moisture in the air since 1991, first in museums and art galleries and then in our customer's homes.

As well as achieving a healthy humidity the Meaco Deluxe 202 Humidifier also cleans the air for you. It comes with a HEPA filter

to remove physical allergens from the air and a charcoal filter to remove odours. An aroma diffuser allows you to add your favourite essence to the air, while an ioniser keeps the air fresh. The Meaco Deluxe 202 Humidifier not only keeps the air clean and humid, the water is also cleaned by an ultraviolet lamp prior to humidification so you are always breathing in humidified air that has been sterilised first.

The Meaco Deluxe 202 Humidifier offers the option of warm or cool mist as you prefer, a night mode to help you fall asleep peacefully, a hard water filter to remove limescale and two directional nozzles to reduce the chances of condensation from forming in front of the humidifier. All in all the Meaco Deluxe 202 Humidifier is a humidifier that ticks all of the boxes for the perfect ultrasonic humidifier.

SPECIFICATIONS

Product Name	Meaco DELUXE 202 Humidifier
Mist Capacity	300ml/h - Cool Mist 400ml/h - Warm Mist
